2021 cloud mountain farm center
program guide & nursery catalog

- fruit & ornamental plants
- new farmer training
- workshops & events
We’ve designed to save water.

We are committed to offering curbside pickup for those not comfortable with in-person browsing. We will also have in-person shopping again in 2021 with safety measures in place. We will also suffer through any glitches in our system—your patience while we worked out the problems was much appreciated. The shutdown also allowed us to FINALLY complete the long-overdue remodel of our sales yard.

We will have in-person shopping again in 2021 with safety measures in place. We will also continue to offer curbside pickup for those not comfortable with in-person browsing. We are excited about the changes in the sales yard—our new retail greenhouse will allow dry shopping even during rainy spells. And as the year goes on, check out the innovative irrigation systems we’ve designed to save water.

As we head into 2021, we want to take a moment and thank everyone who supported us through the difficult year 2020 presented. Our shutdown decision in March due to COVID-19 wasn’t easy to make. We have some vulnerable staff members and a very small sales room. We also recognized the advantage we had already having a robust online platform. Thanks to all who suffered through any glitches in our system—your patience while we worked out the problems was much appreciated. The shutdown also allowed us to FINALLY complete the long-overdue remodel of our sales yard.

cloud mountain farm center online!
If you haven’t visited our website, you should! All fruit and ornamental plants, tools, amendments, seeds, and seasonal produce are all online and available for ordering. www.cloudmountainfarmcenter.org.

You can check availability and securely place orders 24 hours a day, 7 days a week.

growing information
Our mission includes education — we have a wealth of informational handouts and interactive pages on growing fruit and ornamental plants available at our website and at the Center. If you’re looking for information on pruning apples or information on disease management, there’s a page for that.

Table of Contents
INTRODUCTION
introduction and overview 1
workshop schedule 2-3
the nursery @ CMFC 36-37
FRUIT PLANTS
almonds 12
apples 4-5
apricots 8
asparagus 16
blackberries 11
blueberries 10
cherries 8-9
chokeberries 16
currants 10
elderberries 16
figs 16
goji berries 17
gooseberries 23
grapes 14-15

hazelnuts 12
honeyberries 16
kiwis 13
mulberries 17
olives 17
peaches 8
pears, asian 6
pears, european 6
pears, hybrid 7
persimmons 17
plums 7
quince 17
raspberries 12
rhubarb 17
seaberrries 17
strawberries 11
tea 17
walnuts 12
yuzu ichandrin citrus 17

ORNAMENTAL PLANTS
flowering garden trees 18-19
garden trees for foliage & form 19-20
japanese maples 20-22
broadleaf evergreen shrubs 23-25
conifers 26-28
climbing vines 28
perennials & herbs 29-31
deciduous & herbs 31-33
rhododendrons 34-35

prices effective through June 1, 2021

As we head into 2021, we want to take a moment and thank everyone who supported us through the difficult year 2020 presented. Our shutdown decision in March due to COVID-19 wasn’t easy to make. We have some vulnerable staff members and a very small sales room. We also recognized the advantage we had already having a robust online platform. Thanks to all who suffered through any glitches in our system—your patience while we worked out the problems was much appreciated. The shutdown also allowed us to FINALLY complete the long-overdue remodel of our sales yard.

We will have in-person shopping again in 2021 with safety measures in place. We will also continue to offer curbside pickup for those not comfortable with in-person browsing. We are excited about the changes in the sales yard—our new retail greenhouse will allow dry shopping even during rainy spells. growing information
Our mission includes education — we have a wealth of informational handouts and interactive pages on growing fruit and ornamental plants available at our website and at the Center. If you’re looking for information on pruning apples or information on disease management, there’s a page for that.

As a note, we do not ship to other countries.

We ship via USPS Priority Mail from February 15 through mid - to late April, weather permitting. We will only ship when we feel confident that the plants will arrive in good condition. Some plants have very restricted shipping seasons for that reason. When we confirm your order, we will try to specify the ship date that we feel is best. We do not cold store plants. If you are in the Midwest, on the East Coast, or in Alaska, we may not be able to ship you dormant plants during your prime planting season. We ship to all states within the U.S., limited by weather and each state’s agricultural restrictions. At this time, we do not ship to other countries.

gift cards
Cloud Mountain gift cards make a great gift for the garden enthusiast in your life! Available for purchase online or by phone. Gift cards are redeemable online or at the Center.

plants for attracting pollinators
provide a food source for pollinating insects year-round

DECEMBER - FEBRUARY
- Viburnum b. 'Dawn' - fragrant winter viburnum
- Corylus sp. - hazelnut
- Mahonia intermedia - hybrid mahonia
- Helleborus niger, hybridus - hellebore, lenten rose
- Alnus rubra - red alder
- Salix sp. - pussy willow
- Arctostaphylos sp. - manzanita
- Erica x darbyensis - winter heather
- Crocus species & hybrids - crocus

MARCH - MAY
- Ribes sanguinium - red flowering currant
- Acer species - maples
- Mahonia aquifolium - oregon grape
- Sambucus sp. - elderberries
- Rosemarinus officinalis - rosemary
- Vaccinium species - blueberry, huckleberry, cranberry
- Amelanchier species - serviceberry
- Rubus species - blackberry, raspberry

MAY - AUGUST
- Arbutus menziesii - madrone
- Symphoricarpos albus - snowberry
- Herbs - lavender, thyme, oregano, mint
- Agastache - hyssop
- Penstemon species - penstemon, beardtongue
- Salvia species - sage
- Calluna vulgaris - scotch heath
- Achilla millefolium - yarrow

SEPTEMBER - NOVEMBER
- Aster species - aster
- Sedum - stonecrop
- Grevelia victorae - silk oak
- Heptacodium miconoides - seven son tree

plants for winter wet soils
tolerant of heavy soils and high water tables

TREES
- Acer rubrum - red maples
- Betula sp. - birch
- Metasequoia glyptostroboides - dawn redwood
- Nyssa sylvatica - blackgum or tupelo
- Salix sp. - willows
- Chamaecyparis nookatensis - Alaskan cedar
- Pinus contorta & sylvestris - two-needled pines

SHRUBS
- Amelanchier sp. - serviceberry
- Aronia sp. - chokeberry
- Cornus sericea or stolonifera - dogwoods
- Gaultheria shallon - salal
- Hydrangea sp. - hydrangea
- Sambucus sp. - elderberries
- Physocarpus sp. - ninebark
- Viburnum sp. - viburnum (deciduous species)

FRUIT PLANTS
- Mountain ash hybrids (Shipova)
- Pears (both European and Asian pears)
- Filberts (hazelnuts)
- Blueberries (some varieties)
- Lingonberry and cranberry
- Black currant

good plants for hedges
evergreen plants tolerant of shearing for size control

CONIFERS
- Cryptomeria japonica - Japanese cedars
- Thuja plicata - western red cedar
- Tsuga sp. - hemlocks

BROADLEAFED EVERGREENS
- Arbutus unedo - strawberry tree
- Choisya - Mexican mock orange
- Ilex crenata - Japanese holly
- Mahonia aquifolium - Oregon grape
- Myrica californica - pacific wax myrtle
- Osmanthus sp. - fragrant or holly-leafed osmanthus
- Pittosporum heterophylla - Chinese pittosporum
- Prunus lusitancia - Portugal laurel
- Rhododendron - rhododendron

OTHER
- Fargisia sp. - clumping bamboo
- Phyllostachus sp. - running bamboo
2021 community learning at cloud mountain farm center

Workshops in 2021 will be limited and with safety measures in place. Basic workshops will be limited to 10 participants, and Advanced workshops limited to 8 participants. All participants will be required to wear a face covering, and all workshops will be held outside, so be prepared for the weather. Pre-registration is required this year for all workshops.

Basic workshops are $15 per person. Our advanced classes are more in-depth and hands-on, and are $50 per course. Please register for classes on our website or by phone at (360) 966-5859 x 3.

<table>

</thead>
<tbody>
<tr>
<td>Learn to Grow Fruit Trees</td>
<td>2/13 - 10:30am to 12:30pm</td>
<td>Limited to 10 per class, face coverings required, pre-registration required</td>
</tr>
</tbody>
</table>

Thinking about planting fruit trees, but don’t know where to start? This is the place! You’ll learn about the easiest varieties to grow, how to decide which rootstock to plant, where and how to plant, and what initial pruning and training are needed. You’ll leave knowing how to give your trees the best start in the first 3 years.

| Growing Apples & Pears | 2/20 - 10:30am to 12:30pm | Limited to 10 per class, face coverings required, pre-registration required |

Want to know more about growing apples and pears? This class will cover growing techniques and pruning methods for apple and pear trees. The techniques covered will help you to keep your trees healthy and productive year after year.

| Advanced Apple & Pear Growing (Two-part hands-on course) | SESSION A | Limited to 8 per class, face coverings required, pre-registration required |
| Part 1: | Part 1: 2/20 - 1:30pm to 3:30pm | |
| Part 2: | Part 2: 6/12 - 1:30pm to 3:30pm | |
| SESSION B | Part 1: 2/27 - 10:30am to 12:30pm | |
| Part 2: | Part 2: 6/26 - 10:30am to 12:30pm | |

This two-part class will take you beyond basics to enhance your skills as a fruit grower. In the first class, you’ll be working in the orchards pruning established trees, with hands-on instruction. You’ll practice applying pruning theory to trees grown on different training systems, and on trees of different ages. Expect to walk away feeling more confident when working with your fruit trees.

Part 2: In the second class in this two-part series you’ll learn about the process of scouting for pest and disease issues, and about how pruning in Part 1 has affected the early growth of the trees. You’ll also learn about fruit set and participate in a hands-on thinning practicum.

| Growing Small Fruits | 2/27 - 1:30pm to 3:30pm | Limited to 10 per class, face coverings required, pre-registration required |

Did you know that Northwest gardeners can grow an incredible variety of fruits and berries? This workshop will focus on techniques for growing small fruiting plants like blueberries, raspberries, blackberries, strawberries, and kiwis.

| Learn to Grow Organic Fruit at Home | 3/6 - 10:30am to 12:30pm | Limited to 10 per class, face coverings required, pre-registration required |

You can grow tree fruits and berries using organic practices, even in our challenging climate. Learn how to keep your trees and berry plants healthy and productive. This workshop will cover the most common pest and disease issues in our area, and how to deal with them effectively. Other topics will include soil and weed management, and use of compost and mulches in fruit growing.

| Growing Table Grapes | 3/20 - 10:30am to 12:30pm | Limited to 10 per class, face coverings required, pre-registration required |

Join us for this workshop and learn how to grow table grapes successfully here in the Northwest. You’ll learn about trellis design, pruning and training, and about fertility and pest management methods. We’ll also discuss varieties that work in our cool summer climate.
### Growing Wine Grapes
This workshop will provide you with an overview of how to grow wine grapes in our cool climate. You will learn about cultural practices including soil requirements, pruning techniques, pest management, and harvesting. The workshop will take place in the vineyard.

### Growing a Fruiting Wall: Espalier and Beyond
Fruiting Walls and Espalier training systems use a trellis system, and typically produce more fruit per square foot than conventionally trained fruit trees. We will cover various unique training systems for fruit trees that allow growers to maximize limited space while adding aesthetics to the garden. These training systems also make it easy to utilize disease-resistant varieties and insect nets that will allow for clean fruit at harvest. We will discuss apples, pears, cherries, plums, and peaches. The class will cover construction considerations, training, and which plants will succeed.

### Advanced Stone Fruit Growing (Two-part hands-on course)
**Part 1:** Do you still hesitate before you make a pruning cut on your plum or cherry trees? This two-part class will take you beyond theory to enhance your skills. In this first class, you'll be working in the orchards pruning established trees, with hands-on instruction. You'll practice pruning trees of different ages. Stone fruits require special handling when pruning, and are pruned just as the fruit sets. To provide hands-on training, we limit the class size.

**Part 2:** In the second class in this two-part series you'll learn about the process of scouting for pest and disease issues, and about how pruning in Part 1 has affected the early growth of the trees. You'll also learn about fruit set, and participate in a hands-on thinning practicum.

### Summer Care in the Vineyard
This workshop walks you through best practices for managing your vineyard in the hot summer months. The class will cover shoot positioning, summer pruning, bunch thinning, water management, and disease management. All of these techniques are critical to the production of quality grapes for eating and winemaking.

FRUIT PLANTS

apples $29.95

varieties listed in order of ripening

- Zones 5-9
- Great varieties selected especially for Northwest gardens
- All varieties need a pollinizer
- Triploid varieties do not pollinate other varieties
- Easiest to grow are scab-resistant and mildew-resistant
- Look for eating apples that are also good for hard cider

WILLIAMS PRIDE This selection is top quality for early apple season. The fruit is bright red with full-bodied flavor, rare for early selections. Trees have good vigor and are heavy producers. Immune to scab and somewhat resistant to mildew. Early season bloom. Ripens early to mid-August. Rootstocks: G-41 mini-dwarf, M-26 dwarf, M-106 semi-dwarf.

AKANE Bright red apple has juicy, white flesh with wonderful grape-like flavor, superb eaten fresh or for baking. Hangs well on tree, very resistant to scab. Better keeper than most early fall varieties. Ripens early September. Early to midseason bloom. Thin well for good size. Rootstocks: G-41 mini-dwarf, M-26 dwarf, M-106 semi-dwarf.

INITIAL® A mid- to late September ripening apple with very crisp texture, high sugar and low acid fruit. Cross of Gala and Redfree. Scab immune. Will not pollinate other varieties. Developed in France. Propagated protected variety. Rootstock: G-41 mini-dwarf (pick up only).

TSUGARU This mid-September ripening apple has a juicy, sweet caramel flavor, somewhat like the popular Fuji but richer. An annual favorite at our fall tasting. Midseason bloom. Rootstocks: G-41 mini-dwarf M-26 dwarf, M-106 semi-dwarf.

QUEEN COX Cox are known for their world-class flavor. This improved Cox selection produces well in cool summer areas. Stores one month. Medium sized, bi-colored apple. Blooms midseason. Ripens in mid to late September. Rootstocks: M-26 dwarf.

HONEYCRISP Eating quality as the name suggests: very sweet flavor with a distinctive crunchy. Trees are very productive. Large, well-formed fruits, 50–90% red stripe, and a favorite at our fall Fruit Festival. Midseason bloom. Ripens mid- to late September. Rootstocks: G-41 mini-dwarf, M-26 dwarf, M-106 semi-dwarf.

FIESTA Cox’s Orange Pippen x Idared. Easier to grow than many Cox types, this is a productive, disease-resistant cultivar with tangy, aromatic sweet flavor. Stores up to 6 weeks. Mid- to late-season bloom. Ripens late September. Rootstocks: M-27 mini-dwarf, M-26 dwarf, M-106 semi-dwarf (pick up only).

ELSTAR Scab resistant, vigorous tree that branches profusely. Fruit quality is excellent, crisp and juicy, with intense aromatic sweet-tart flavors. Fruit size is medium. Pick slightly green to store. Will store to December if refrigerated. Midseason bloom. Ripens late September. Rootstocks: G-41 mini-dwarf, M-26 dwarf, M-106 semi-dwarf.

NORTHEAST COLONNAR APPLE A deep red, McIntosh-type apple. Like other columnar apples, it will grow to 8–10’ tall, but stay only 3’ wide. Midseason bloom. Ripens late September. Rootstock: M-106 semi-dwarf.

SILVER SENTINEL COLUMNAR APPLE Large yellow fruit with a deep red blush. Crisp and sweet with pure white flesh. Moderate disease resistance.
check plant availability and purchase online at www.cloudmountainfarmcenter.org

**NEW! CRIMSON TOPAZ** A promising scab- and mildew-resistant variety for our climate. Crimson Topaz has impressed us with its crisp, hard flesh and wonderful sweet-tart flavor. Stores 4–5 months. Midseason bloom. Ripens mid-October. Rootstocks: G-41 mini-dwarf, M-26 dwarf, M-106 semi-dwarf $S

**BENI SHOGUN FUJI** At last, a Fuji that ripens consistently for cool summer climates. Intensely sweet, crisp apple. Moderate resistance to scab. Keeps until March. Late bloom. Ripens mid-October. Rootstocks: G-41 mini-dwarf, M-26 dwarf, M-106 semi-dwarf $S

**COSMIC CRISP** WSU cross of Honeycrisp and Enterprise. Very productive variety with large fruit, red over a green background. Fruit is crisp and sweet and stores well. Easier to grow than Honeycrisp. Mid- to late-season bloom. Ripens mid to late October in Western WA. Only available to plant in WA state. Rootstocks: M-26 dwarf, M-106 semi-dwarf $S $2.95 each

**ASHMEADS KERNAL** One of the finest russets of all time. Flat, gold-brown apple, very sweet and juicy. Over 200 years old and has won awards worldwide. Good keeper. Midseason bloom. Ripens mid-October. Triploid: will not pollinize other varieties. Rootstocks: G-41 mini-dwarf, M-26 dwarf, M-106 semi-dwarf $S

**FLORINA** Large purple-red apple with aromatic spicy flavor. Vigorous tree and strong producer. Scab immune and mildew resistant. Fruit will keep into January or early February. Mid- to late-season bloom. Ripens mid- to late October. Rootstocks: G-41 mini-dwarf, M-26 dwarf, M-106 semi-dwarf $S

**ROXBURY RUSSET** Heirloom russet with sweet aromatic flavor. Russet brown skin with a green undertone. Highly esteemed for eating, cooking, and cider. Stores well into February/March. Midseason bloom. Mid- to late-October ripening. Will not pollinize other varieties. Rootstocks: M-27 mini-dwarf, M-26 dwarf, M-106 semi-dwarf (pick up only) $S $2

---

### edible crabapple

**CENTENNIAL** Small elongated fruits have a bright scarlet blush with a crisp, sweet flavor that makes them excellent for eating fresh and good for canning. This beautiful, ornamental tree is very compact, yet productive and scab resistant. Blooms early midseason. Ripens mid-August. Rootstock: M-106 $S

### hard cider apples

**KINGSTON BLACK** Considered by the British as one of the finest bittersharp cider apples of all time. Carries a complexity of flavors that would improve any cider blend, also can be made as a varietal cider. Fruit is medium sized with dark red blush. Late season bloom. Ripens mid-September. Rootstocks: M-111 semi-standard $S

**REINES DES POMMES** Bittersweet cider variety, soft tannins and high sugar make it suitable for varietal cider or blending. Very late bloom. Ripens early to mid-October. Rootstocks: M-111 semi-standard $S

**BROWN SNOT** A productive bittersweet cider apple, slightly biennial. A good balance of sugars, acids, and tannins, suitable for varietal cider or blending. Late-season bloom. Ripens in mid-October. Rootstocks: M-26 dwarf $S

**DABINETT** Bittersweet variety, good for blending. Soft tannins, very high sugar. Biennial tendency. Midseason bloom. Ripens mid- to late October. Rootstocks: M-111 semi-standard $S

---

### apple rootstocks

**$4.00 each**

Graft your own apple tree. We ship rootstocks in early March—order early!

**M-26 Dwarf Rootstock**

**M-106 Semi-Dwarf Rootstock**

---

### apple rootstock info

**GENEVA 41** *(Mini-Dwarf)* Grows to 5–8’ in height. Very productive for their size, these rootstocks also lend the trees resistance to replant disease and fireblight. Permanent support required. 4’ spacing.

**M-26 (Dwarf)** Grows to 7–12’ in height, very productive and cold hardy; will not tolerate poorly drained soil. Requires staking in early years and permanently in some situations. 7–9’ spacing.

**M-106 (Semi-Dwarf)** Grows to 10–15’ in height and produces a well-anchored root system. Trees are precocious and very productive on this rootstock. Proven to handle a wide range of soil conditions, very hardy. Requires staking in early years. 10–12’ spacing.

**M-111 (Standard)** Grows 15–20’ in height. Tolerant of most soil types and somewhat drought tolerant. 15’ spacing. Tolerant. Space at least 15’ apart.

---

**FRUIT**

### APPLE POLLINATION

Apples require careful attention to matching bloom times for good fruit set. In our cool spring climate, we have extended bloom times—other climates with warm springs may have more compressed bloom seasons that allow more pollinizer choices. The charts below are based on our experience in the Pacific Northwest; contact your local Master Gardeners or county agricultural extension agent for information about bloom times in your area.

#### very early

**European Pears** $29.95

**Varieties Listed in Order of Ripening**

**UBILEEN** Large, red-blushed pear with juicy, buttery flesh. Does not store well, but great for canning or drying. Early to midseason bloom. Ripens early to mid-August.

**ORCAS** Large, smooth, juicy pear with mild sweet flavor. Excellent for canning and drying as well as fresh eating. Vigorous and bears heavily. Originated on Orcas Island as a seedling. Midseason bloom. Ripens early September.

**RESCUE** Large yellow pear with red blush. Excellent flavor, great for fresh eating, canning, and drying. Disease-resistant. Midseason bloom. Ripens early to mid-September.

**MANON** Excellent quality, mid-length storage. Disease resistant. Midseason bloom. Mid-September ripening.

**CONFERENCE** A longtime European favorite. Medium-sized, golden-speckled, long-necked pear with an intense, sweet, distinctive spicy flavor. Can be eaten right off the tree or stored in refrigeration for months. Strong producer. Early season bloom. Ripens late September.

**COMICE** This pear has a juicy, fine buttery texture and flavor. Large broad-based shape. Dull yellow when ripe. Needs one month of storage before ripe. Stores well until Christmas. Late season bloom. Ripens early October.

**BEURRE BOSC** A large, long-necked, golden-brown russetted pear. The flesh is finely textured and tender, with a spicy rich flavor. Very productive. High-quality pear, keeps well. Mid- to late-season bloom. Ripens early to mid-October.

---

**Asian Pears** $29.95

**SHINSEIKI** Yellow-skinned fruit with white flesh and sweet mellow flavor. Medium large fruit keeps into January. Spreading type tree. Early midseason bloom. Ripens mid-August. (Pick up only)

**HAMESE** A good producer of yellow-skinned, very sweet, crisp pears. Consistent quality, year after year. Early midseason bloom. Ripens mid-to-late August. (Pick up only)

**NIJISEIKI** Also known as ‘20th Century,’ this delicious yellow-skinned variety is the one found in the gourmet fruit sections of many markets. It is the most popular variety in Japan. Very juicy with good balance of sweetness and tartness. Vigorous tree. Early season bloom. Ripens late August.

**MISHIRASU** Very large fruit, shaped and flavored more like a European pear. Flesh is intensely sweet, quite crisp and crunchy, with a golden speckled green skin. Highly rated at our tasting. Early season bloom. Ripens mid-to-late September. (Pick up only)

---

**Pear Rootstock**

**OHF-87 (Semi-Dwarf)** For use with European and Asian Pears. Precocious and productive. Suitable for high-density plantings and espalier. Can be maintained at 10’–12’. Space 7’–9’. A true Pyrus—hardy to Zone 4.
Fruit

Check plant availability and purchase online at www.cloudmountainfarmcenter.org

Hybrid Pears $29.95

Maxie™ A cross of Nijiseki Asian Pear and Red Bartlett European Pear. Maxie is round, crisp and juicy like an Asian Pear, but with the complex European-Pear flavor. Early bloom. Ripens on the tree in late August to early September.

ShiPova A cross of European Pear and Mountain Ash, bearing plum-sized fruits in early September that have a sweet, delicate flavor. Partially self-fertile, but better fruit set if a European-Pear pollinizer is nearby. Grows to 10’–15’.

Plums $32.95

- Hardy to Zone 4
- Varieties chosen for disease resistance
- Most varieties need a pollinizer
- European plums pollinize other European plums (bloom too late for Japanes)

European Plums varieties listed in order of ripening

Elma’s Special Comes from an old orchard in Bellingham, and is probably an old variety known as Sanctus Hubertus. Purple-skinned fruit is very high quality, freestone, medium to small. Fleshy, juicy, full rich flavor. Consistent heavy bearer. Excellent fresh or processed, exceptional dried and in jam. Ripens late July to early August. Rootstocks: Krymsk 99 dwarf, St. Julian A semi-dwarf

Imperial Epineuse An antique French prune variety that sets the standard in prune plum flavor. Excellent prune plum for drying. The sweet, firm, freestone fruit ripens early to mid-August. Rootstock: Krymsk 99 dwarf, St. Julian A semi-dwarf

Queen Victoria A large, oval, pinkish-purple skinned freestone plum with sweet, golden flesh. Excellent fresh or dried. Partially self-fertile. Ripens late August. Rootstock: St. Julian A semi-dwarf

Yellow Egg Large oval, bright yellow plum with yellow flesh. Excellent for fresh eating or canning. Ripens early September. Rootstock: St. Julian A semi-dwarf

Stanley (Italian Prune type) Excellent for cooking and eating fresh. Hardy, vigorous, and produces full crops annually. The fruit is large, dark blue, juicy, and good quality. Partially self-fertile. Ripens early to mid-September. Rootstock: St. Julian A semi-dwarf

Japanese Plums

Methley (Self-fertile) Earliest ripening plum. Fruits are reddish-purple with juicy, sweet, red fleshy. Production is consistent and very heavy. Ripens mid-to-late July. Rootstock: Krymsk 99 dwarf, St. Julian A semi-dwarf

Shiro Yellow skin and flesh with very sweet, juicy flavor. Consistent bearer, very productive. Most consistent producer of the Japanese types for this area. Ripens early August. Rootstock: St. Julian A semi-dwarf

Hollywood Truly an edible ornamental! Pale pink flowers and deep purple foliage are a bonus to the deep red fruit that ripens mid-August. Excellent for plum jelly. Partially self-fertile, Methley is a good pollinizer. Rootstock: St. Julian A semi-dwarf

Peach Plums

Krymsk 99 (Dwarf) A precocious dwarf rootstock for plums and apricots. Krymsk 99 can be kept under 10’-12’. Very productive, heavy crops may need thinning for good fruit size. Not drought tolerant.

St. Julian A (Semi-Dwarf) Precocious and productive and well anchored. Grows to 12’-15’.

Krymsk 86 (Semi-Dwarf) Slightly larger than St. Julian A. Well anchored and tolerant of heavy soil. Grows to 15’.

Peach & Plum Rootstocks

Page 7
peaches $32.95
varieties listed in order of ripening

AVALON PRIDE Selected in Western Washington, this semi-freestone, red-skinned peach is leaf-curl resistant and sets fruit well in our maritime climate. Sweet, yellow-fleshed peaches ripen early to mid-August. Plan to control for Peach Leaf Curl on young trees. Rootstocks: St. Julien A Semi-Dwarf

FROST PEACH Yellow-fleshed fruit with flavor similar to locally grown Red Havens. Large to medium size with soft flesh. Very heavy bearing and must be thinned. Generally freestone and resistant to split pit. Leaf-curl resistant, with showy blooms. Ripens mid-August. Rootstock: St. Julian A semi-dwarf, Krymsk 86 semi-dwarf

SALISH SUMMER (Q-18) A WSU introduction. Salish Summer is a white-fleshed peach, semi-freestone, ripening mid-August. Curr resistant once established; young trees should be managed for Peach Leaf Curl. Rootstocks: St. Julien A semi-dwarf

The following considerations are shared among varieties:

- Hardy to Zone 5
- All varieties are self-fertile
- Need well-drained soil and warm site
- Manage for Peach Leaf Curl while trees are young
- Space 10’-12’ on St. Julian A semi-dwarf rootstock
- Space 12’-15’ on Krymsk 86 semi-dwarf rootstock
- Space 12’-15’ on Lovell semi-dwarf rootstock
- Intensely flavored varieties

We suggest Sulfur or Copper-Sulfate mixed with a sticker, which holds the chemical on the plant longer. For specific concentrations of chemicals, read the label. Spraying must happen when leaves are off the tree. First spray: at bud swell, approximately mid-January. Second spray: approximately three weeks after bud break or first spray. Third spray: three weeks after second spray. Varieties resistant to leaf curl should be sprayed until well established. Even established resistant trees may show some leaf curl in certain springs, but will recover quickly.

apricots $32.95

- Hardy to Zone 5
- All varieties are self-fertile but set more fruit if a pollinator is planted
- Need warm, well-drained site protected from late frost
- Space 10’-12’ on St. Julian A semi-dwarf rootstock

PUGET GOLD This is the most proven variety for the Pacific Northwest. Blooms later than most cultivars, usually avoiding most damaging frosts. Fruit is large with classic apricot shape and bright-orange, freestone fruit. Ripens early to mid-August. Rootstock: St. Julian A semi-dwarf

HARGLOW A late blooming apricot variety that shows promise for the Pacific Northwest. Large, deep-orange fruit with excellent flavor. Ripens a little after Puget Gold. Shows good disease resistance. Rootstock: St. Julian A semi-dwarf

We suggest Sulfur or Copper-Sulfate mixed with a sticker, which holds the chemical on the plant longer. For specific concentrations of chemicals, read the label. Spraying must happen when leaves are off the tree. First spray: at bud swell, approximately mid-January. Second spray: approximately three weeks after bud break or first spray. Third spray: three weeks after second spray. Varieties resistant to leaf curl should be sprayed until well established. Even established resistant trees may show some leaf curl in certain springs, but will recover quickly.

tart cherries $32.95
varieties listed in order of ripening

DANUBE Large-sized fruit with burgundy-red skin. The flesh and juice of this cherry make for wonderful pies and jams. High sugar for a pie cherry. Ripens mid- to late-July, vigorous and productive. Rootstock: Gisela 5 dwarf (pick up only)

The following considerations are shared among varieties:

- Hardy to Zone 5
- Space 8’-10’ on Gisela 5 dwarf rootstock
- Space 15’-20’ on Mazzard semi-dwarf rootstock
- Stake dwarf trees to support fruit load
- Self-fertile
- Will not pollinate with sweet cherries
- Easiest cherries to grow
- Protect from birds
sweet cherries $32.95

varieties listed in order of ripening

BLACK GOLD (self-fertile) Very late blooming black cherry, escaping most frost. The tree also has good canker resistance. The large, firm black cherries are crack-resistant, have excellent flavor, and ripen early to mid-July. Rootstocks: Gisela 5 dwarf, Krymsk 6 dwarf

RAINIER Large, yellow, Royal Ann type. Firm flesh; high quality for eating and canning. Trees are vigorous, productive and very hardy. Ripens mid-July. Rootstocks: Gisela 5 dwarf

WHITE GOLD (Self-Fertile) An excellent red-blushed yellow cherry. White Gold is crack-resistant and resistant to bacterial canker. Ripens in mid-July. Rootstocks: Gisela 5 dwarf

STARLETTA ‘Tom’s Blush’ (self-fertile) Large, red-blushed yellow cherries, ripening just after Rainier, mid- to late-July. Very resistant to bacterial canker. Rootstock: Krymsk 6 dwarf

VANDELAY (self-fertile) A reddish black cherry from Canada that resists bacterial canker. Very large, firm, crack-resistant cherries with excellent flavor. Ripens mid- to late-July. Rootstock: Gisela 5 dwarf

LAPINS (self-fertile) Dark, crack-resistant cherry, firm with great flavor. Ripens late July or early August. A great cherry tree if you can only have one! Rootstocks: Gisela 5 dwarf, Mazzard semi-dwarf

Cherry rootstock info

DWARF GISELA #5 The growth habit on this rootstock is more spreading than upright—a desirable trait for cherries on trellis systems. Root anchorage is only fair, so staking is necessary. The stake is also extremely valuable for tying up branches laden with fruit. Can be maintained under 10’ and is suitable for trellis systems. 8’–10’ spacing.

DWARF KRYMSK 6 Precocious with good anchorage and some tolerance of wetter soils. Unlike Gisela, productive varieties will not overset and produce small fruit on this rootstock. Can be maintained at 10’–12’ spacing of 10’–12’ spacing.

SEMI-DWARF MAZZARD Tolerant of heavy soils. Well anchored, so only initial staking needed. Vigorous sweet cherries on Mazzard will become large trees if not pruned. Sweet cherries can be maintained at 15’–18’, tart cherries at 12’–15’. 15’–20’ spacing

getting started with UFO cherries

The Upright Fruiting Offshoots (UFO) system for sweet cherries was developed to simplify training, pruning, and crop management. At maturity, the UFO system yields a fruiting wall that is productive and simple to maintain. Each tree has a permanent single horizontal trunk from which fruiting shoots are grown vertically. Fruit are borne predominantly on spurs but also at the base of 1-year-old shoots, all on vertical wood. Establishing the UFO system is straightforward with little to no pruning required at planting.

SPACING:
• Space rows 9’–10’ apart;
• In the row, space trees 5’–6’ apart (Gisela 5 Rootstock);
• Trellis should be at least 5 wires—lowest wire at 20’, then spaced every 18”–20”;
• Unbranched (whip) trees are planted at a 45-degree angle, pointing the terminal to the south (important: do not plant the trees vertically and bend them to a 45-degree angle);

For complete growing and training details, visit the Training UFO Sweet Cherries page our website.
currants & gooseberries

currants $14.95

ROVADA (Red) Very large fruit borne on long chains make picking a breeze. This selection from Holland is quite productive and very disease resistant too! Excellent for preserves or eating fresh.

BEN SAREK (Black) A disease-resistant black currant from the Scottish Research Institute. Compact bushes are loaded with large, shiny black fruit. Mildew and rust resistant. Grows to 3–4'. (available late spring 2021)

TIBEN (Black) Black currant from Poland with excellent disease resistance. High yielding and easy to grow. Late ripening and very sweet.

WHITE PEARL (White) Highly productive cultivar. Beautiful pinkish-white translucent fruit is sweet and flavorful. Attractive upright growth habit. (available late spring 2021)

gooseberries $14.95

ACHILLES RED Large fruit can be used green for cooking or allowed to ripen to deep red for fresh eating. Later ripening than many varieties. A compact growing plant with good rust resistance.

BLACK VELVET Extremely productive variety with sweet, dark-red fruit with a blueberry-like flavor. Good disease resistance.

POORMAN Vigorous, very productive upright plant that produces the sweetest gooseberry you’ll ever eat. Berry size is large with pinkish red color. Very disease resistant.

ORUS 8 Medium-sized dark-purple fruit with wonderful flavor—considered one of the best gooseberries for fresh eating. This cross of gooseberry and black currant is very pest and disease resistant.

blueberries $16.95

varieties listed in order of ripening

- Blueberries ripen July–August
- Mature at 3 ½’–6’ high
- Space 3 ½’–6’ at planting
- Best in moist, acidic soil
- 1 gl. size

SPARTAN Giant, light blue berries have a delicious tangy, sweet flavor. Upright habit, to 5’–6,’ with bright gold and orange fall color. Ripens late June-early July. Hardy to Zone 5.

REKA Very productive and vigorous, Reka bears medium to large, dark-blue berries with excellent flavor. Tolerant of most soil types, even winter wet. Ripens late June-early July. Hardy to Zone 4.

PATRIOT Large dark-blue, highly flavored berries. Producing 10–20 lbs. of fruit at maturity. Will perform in wet soils better than most varieties. Spreading growth habit to 4’. Ripens starting early July over several weeks. Hardy to Zone 3.

DRAPER Large crisp, light-blue berries are easy and quick to pick. Mild sweet flavor. Stocky, upright habit, grows 4’–6’ high. Ripens early to mid-July over several weeks. Berries hold well on the bush. Hardy to Zone 5.

NORTHLAND Medium-sized berries are very sweet. Bush is vigorous with spreading habit. Extremely productive: over 20 lbs. per bush. Good choice for freezing—they ripen all at once. 4’ tall at maturity. Ripens early- to mid-July. Hardy to Zone 3.

BLUE CROP Berries are medium-large and light blue with firm flesh. Flavor good, moderately aromatic. Plant is vigorous and a consistent heavy producer. Spreading growth, 6' tall at maturity. Ripens mid-July. Hardy to Zone 4.

SUNSHINE BLUE (self-fertile) This semi-dwarf, semi-evergreen blueberry is a compact bush, growing to 3’ tall. Showy hot-pink flowers yield large crops of high-quality dime-sized fruit. Harvest can last 9 weeks. Will tolerate higher pH than most blueberries. An excellent patio plant. Ripens starting mid-July. Hardy to Zone 5.

CHANDLER Giant berries with delicious flavor! The huge berries ripen over a six-week period. Upright spreading form, reaching 5’–6’ at maturity. Ripens mid- to late-July. Hardy to Zone 4.

LIBERTY Large, sky-blue berries are firm with excellent flavor. This compact bush grows to 3’. Ripens mid- to late-July. Hardy to Zone 3.

blueberry relative

EVERGREEN HUCKLEBERRY (Vaccinium ovatum) Produces a multitude of white or pinkish bell-shaped blossoms in April and May, and tasty blue-black berries in late August and September. Prefers a shady environment but can take full sun in cooler areas. Erect shrub grows 8’–10’ in partial shade, 4’–5’ in full sun. Prefers acid soil and mulched roots. Hardy to Zone 7. 1 gl. - $16.95
blackberries $10.95
varieties listed in order of ripening

- Best in well-drained, fertile soil
- Protect from severe winter cold
- Provide trellis support
- Best crops with ample summer water
- Ripen July-August
- Space 4’–6’ at planting
- We sell 2-yr.-old canes

MARIONBERRY A medium to large blackberry with bright red to reddish black fruit, excellent sweet flavor. This is one of the most productive and vigorous blackberries. Fruits are long and conical with medium firmness, perfect for fresh eating and for processing. Ripens late July into early August in the Northwest. Hardy to Zone 7.

THORNLESS TRIPLE CROWN Very productive vines bear huge sweet berries beginning in August and continuing till frost. Well-managed plants have been reported to bear over 30 lbs. of fruit per plant. Hardy to Zone 5.

strawberries bundle of 20 - $10.95

- Main croppers for one big June or July crop
- Day-neutral (everbearers) for all-summer crops
- 10”–18” spacing
- Well-drained fertile soil, full sun
- Disease-resistant varieties produce 4–6 years before needing replanting

everbearing (day-neutral)
Hardy to Zone 4

Prune runners and thin first set of blossoms for best production

SEASCAPE Excellent flavor with heavy yields of large berries and good disease resistance. A proven cultivar in the Northwest: low chill requirements make it promising for warm winter climates.

SWEET ANN A new day-neutral cultivar from Lassen Canyon Nursery. Sweet Ann is productive, producing large fruit with excellent flavor. Does not produce prolific runners. Very disease resistant.

main croppers (June bearers)
Hardy to Zone 6

TILLAMOOK Large to very large berries ripen midseason. Very firm, great for fresh eating or freezing. Good disease resistance.

MARY’S PEAK A new variety developed for the PNW. Large firm berries with excellent flavor good for fresh eating or for processing. Upright plants are very productive. Ripens late season.
raspberries

1–4 $6.95 each / 5–9 $5.79 each / 10+ $4.50 per variety

- Hardy to Zone 6
- Space 24”–30” when planting
- Best in fertile, well-drained soil
- Do not plant too deep! This is the #1 reason for failure
- Summer raspberries bear heavy crops on second year canes
- Fall raspberries bear on 1 and 2 year canes, can produce 2 light crops each year, or 1 heavy crop in autumn

summer bearing

MEKER Fruit is large, rich red, and firm. Outstanding fruit with excellent quality for fresh eating and processing. Very productive. In the coldest areas, plant in protected areas if possible. Somewhat resistant to berry rot.

CASCADE DELIGHT Very large berries are bright red, quite firm, with excellent flavor, rivaling Tulameen. Productive plants are resistant to root rot, suitable for wetter ground than Tulameen or Meeker.

TULAMEEN Firm, very large, light-red aromatic fruit is produced over a long summer season in July and August. Good flavor, productive, and easy to grow in a wide range of soils.

fall bearing

CAROLINE An early cropping, fall fruiting, red-raspberry cultivar known for its exceptional flavor. Extremely productive with large, firm fruit. Somewhat tolerant of root rot. Fruit ripens mid-August until frost or rain halts production.

FALL GOLD Enjoy intensely sweet, golden yellow berries from late-August until mid-October. A great change from red varieties. Medium to large size berries with good yields.

hazelnuts $29.95

- Hardy to Zone 5
- Trees mature at 15’–20’
- Tolerant of most soils
- All varieties need a pollinator, best nut set with 3 or more varieties
- All varieties are very resistant to Eastern Filbert Blight

JEFFERSON High quality, large nuts on a compact, very blight-resistant cultivar. Low blank ratio. For best pollination, plant with York, Theta, or Yamhill. 15’ at maturity.

THETA A blight resistant hazelnut from OSU. Moderate sized tree bears medium sized nuts of good quality. Good pollinator for Jefferson, York, and Yamhill.

YAMHILL A new OSU hazelnut with complete resistance to Eastern Filbert Blight. Compact habit, less than 10’ tall, 12’ wide at maturity. Small, high-quality nuts. Pollinizes with York, Jefferson, or Theta.

YORK A midseason pollinizer with a long bloom-season. Compatible with most cultivars, including Theta, Jefferson, and Yamhill. Highly resistant to Eastern Filbert Blight and produces round, medium-sized nuts.

walnuts $34.95

- Hardy to Zone 4
- Large trees, mature at 30’–40’
- Best in deep, well-drained soil
- Partially self-fertile, best nut production with a pollinator
- Walnuts ripen mid-October

CASCADE An outstanding, relatively new selection. Very precocious and heavy producing. Care must be taken when cropping at an early age. Clusters of 6 or more nuts can bend the branches to the ground. Nuts are buttery and flavorful.

MANREGION Vigorous, fast-growing trees with lateral branching habit. Highly productive with large, high-quality nuts.
**Fruit**

### Almonds

**Bounty**
A hardy, late blooming, Ukrainian variety that bears heavy crops of sweet, soft-shelled nuts. Somewhat self-fertile; larger crops if two varieties are planted. Not proven in Western WA, but worth trying.

### Kiwi fruit

#### Hardy (Actinidia arguta)

$19.95

*Hardy to Zone 5*

**74-49** (Female) Earliest ripening hardy kiwi in this group. Large, smooth-skinned fruit similar to Ana, but ripening a week or two earlier, starting late September. Pollinized by arguta male.

**Ananasnaja (‘ana’)** (Female) Vigorous vines with outstanding flavorful, spicy fruit. Smooth skin, no need to peel. Fruit is 1½” long. Ours ripen early October. Pollinized by arguta male.

**Hardy Red** (Female) Striking cranberry-red fruit with a delicious sweet-tart flavor, always a favorite in taste tests. Ripens early-to-mid –October. Pollinized by arguta male.

**Jumbo** (Female) Italian variety with one of the largest fruits of the hardy kiwis. Tasty sweet fruit, productive vines, slightly later ripening than Ana, in mid-October. Pollinized by arguta male.

**Arguta Kiwi** (Male) Pollinizes up to 8 females; plant within 100’ of females. Does not need extensive overhead trellising as it does not produce fruit.

#### Fuzzy (Actinidia deliciosa)

**Hardy to Zone 7**

**Jenny** (Female) A self-fertile fuzzy kiwi for the smaller yard! Jenny will produce kiwis that ripen mid-October, and store well in refrigeration. Planting in a protected area and wrapping the trunk of young vines at dormancy is recommended. *(available late spring 2021)*

**Saanichton** (Female) Similar to the kiwi you find in the markets, and proven in our area. Beautiful, vigorous vine with large fuzzy leaves. A delectable kiwi flavor with a fuzzy skin and attractive lime-green flesh, ripening mid-to-late October. Fuzzy kiwi store well, much longer than the smooth skinned hardy kiwis. Plant in protected locations. We recommend wrapping all the trunks with closed-cell insulation at dormancy; that seems to solve most cold-hardiness problems. Hardy to 10˚F. 1 gl. - $19.95

**California** (Male) Necessary to pollinize Saanichton. Will pollinate up to 8 plants. *(pick up only)*

#### Variegated, hardy (Actinidia kolomikta)

$19.95

*Hardy to Zone 3*

**September Sun** (Female) These are the most ornamental vines of the kiwis we offer. The smooth-skinned fruit is high quality and the sweetest of the kiwis. It is also the smallest (¼” diameter); they can be eaten like grapes. Ripens early September in the Northwest; well suited for cool summer areas. This vine is not very vigorous so ideal for more confined locations. Both female and male vines are very attractive. Hardy to -40˚F.

**Kolomikta** (Male) Pollinizes up to 8 females. The male is particularly striking with its pink, white, and green variegated leaves. Retains leaf color best when grown in partial shade in a cool location.
### Table Grapes $16.95

<table>
<thead>
<tr>
<th>Varieties Listed in Order of Ripening</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>INTERLAKEN</strong> Ripens mid-September. Golden clusters are medium in size with small berries. Bunching tends to be uneven in some years. Fruit quality is outstanding.</td>
</tr>
<tr>
<td><strong>JUPITER</strong> Ripens mid-September. Large bunches of seedless blue-black berries. Excellent flavor, crisp berries. One of the best for cool sites.</td>
</tr>
<tr>
<td><strong>VENUS</strong> Ripens late September. Large bunches of blue-black berries, most years seedless but with an occasional soft seed. Distinctive flavor, consistent producer.</td>
</tr>
<tr>
<td><strong>RELIANCE</strong> Ripens late September. Sweet-flavored red seedless grape, a popular favorite at our fall tasting. Clusters are full and berries large for the maritime climate. Very productive.</td>
</tr>
<tr>
<td><strong>MARS</strong> Ripens mid-to-late September. Large bunches of blue-black berries, most years seedless but with an occasional soft seed. Excellent flavor, consistent producer when spur pruned.</td>
</tr>
<tr>
<td><strong>GLENORA</strong> A seedless deep blue-black grape with slightly slip-skin like a Concord. An excellent variety if you love the Concord flavor but don’t want seeds. <strong>Ripens late September to early October.</strong> On the border for ripening in the coolest sites.</td>
</tr>
<tr>
<td><strong>FAITH</strong> A blue-black seedless grape ripening in late September. Very crack resistant. Best in a warm site.</td>
</tr>
<tr>
<td><strong>SATURN</strong> Ripens early October. Productive variety with crisp, seedless red berries of excellent flavor. Has been very productive in local fruit test plots. Best in a warm site.</td>
</tr>
<tr>
<td><strong>HOPE</strong> Green seedless grapes ripen in early October. Very productive and crack resistant. Needs a warm site to fully ripen in Western WA.</td>

</tbody>
</table>

Northwest Washington has generally cool summers. Grape growers talk about Growing Degree Days when considering ripening times. Growing Degree Days (GDD) measure the accumulation of heat above 50°F during the summer. Much of Northwest Washington has GDD’s of 1500–1700. If you live near I-5, or within 20 miles of salt water, the earlier ripening varieties will be the most likely to work for you.

**INTERLAKEN** Ripens mid-September. Golden clusters are medium in size with small berries. Bunching tends to be uneven in some years. Fruit quality is outstanding.

**JUPITER** Ripens mid-September. Large bunches of seedless blue-black berries. Excellent flavor, crisp berries. One of the best for cool sites.

**VENUS** Ripens late September. Large bunches of blue-black berries, most years seedless but with an occasional soft seed. Distinctive flavor, consistent producer.

**RELIANCE** Ripens late September. Sweet-flavored red seedless grape, a popular favorite at our fall tasting. Clusters are full and berries large for the maritime climate. Very productive.

**MARS** Ripens mid-to-late September. Large bunches of blue-black berries, most years seedless but with an occasional soft seed. Excellent flavor, consistent producer when spur pruned.

**GLENORA** A seedless deep blue-black grape with slightly slip-skin like a Concord. An excellent variety if you love the Concord flavor but don’t want seeds. **Ripens late September to early October.** On the border for ripening in the coolest sites.

**FAITH** A blue-black seedless grape ripening in late September. Very crack resistant. Best in a warm site.

**SATURN** Ripens early October. Productive variety with crisp, seedless red berries of excellent flavor. Has been very productive in local fruit test plots. Best in a warm site.

**HOPE** Green seedless grapes ripen in early October. Very productive and crack resistant. Needs a warm site to fully ripen in Western WA.
wine grapes $16.95

- Hardy to Zone 5 when established
- Own Root
- Needs trellis support
- Annual pruning required for full crops
- Space 4’–8’ at planting

starting with grapes in the northwest

Our region differs from the main grape-growing regions of the world because of our lack of summer heat. But both table and wine grapes can be grown here successfully. A couple of tips to help you succeed:

- **SITE** - grapes absolutely need full sun, and should be sited in the warmest spot you have;
- **SOIL** - grapes prefer well-drained sandy or gravelly soil—if your soil is heavy, build raised beds or rows;
- **ON ESTABLISHED GRAPES** thinning shoots and fruit bunches is essential to fruit quality;
- **TRAINING FOR WINE GRAPES**: Vertical Shoot Positioning (VSP) is a cane-pruning method that is easy to learn and maintain—new canes are trained on the lowest wire of a trellis, and shoots from those are trained vertically and bear fruit;
- **TRAINING FOR TABLE GRAPES**: curtain/spur-pruned systems are the most productive for table grapes. Permanent cordons are trained on a high wire—shoots grow from spurs on the cordons and hang down, each shoot bearing a bunch of grapes.
- **VISIT OUR GROWING TIPS PAGES** for more detailed information on growing grapes in our climate.

**MADELEINE ANGEVINE**

A mid-September ripening, very worthwhile grape, giving heavy crops of green-white berries that yield large quantities of juice for wine, and may also be enjoyed fresh. Bunch rot and mildew susceptible. Makes an outstanding white wine. Needs 1600-1900 GDD to ripen. (available June 2021)

**ISKORKA**

Originating in Russia (name means “sparkle”), it makes an excellent white wine with mineral notes. Needs 1600 GDD to ripen.

**SIEGERREBE**

Ripens early September. Pink wine grape with small bunches. Good quality, low-acid maturity—makes excellent white wine. Moderately productive, medium vigor. Needs less than 1600 GDD to ripen.

**ORTEGA**

An early ripening white wine grape, with high sugar levels and low acidity, grown for years on Vancouver Island. Makes a light, fruity wine. Very productive. Cross between Muller-Thurgau and Siegerrebe. 1600-1900 GDD.

**GARANOIR**

A very early ripening red, of Swiss origin. This cross of Gamay Noir and Reichensteiner does not gain high sugars, but has low acids when ripe, making it an excellent grape for blending with higher sugar, higher acid juice. Under 1600 GDD needed to ripen.

**GOLUBOK**

Russian origin; an early teinturier with a lot of potential for a unique full-bodied red wine. One of the most promising early reds in our trial; requires less than 1600 GDD to ripen.

**PINOT NOIR PRECOCE**

An early ripening sport of Pinot Noir that is showing much promise in our grape trials. This clone of Pinot Noir can ripen up to three weeks earlier than other Pinot Noir clones. Acid will drop into very acceptable levels every year in our trials. Needs less than 1600 GDD to ripen. (available June 2021)

**PINOT NOIR 71 (French 777)**

One of the most promising clones of Pinot Noir in our trials so far, ripening before the Wadenswill and Dijon clones. Plant canopies must be well managed and cluster-thinned to achieve quality in all Pinot clones grown in this region. 1800–1900 GDD needed to ripen. (available June 2021)

**REGENT**

A recent German cross. Bred mainly for the German organic wine industry. Regent is extremely resistant to diseases. Ripens at least a week ahead of Pinot Noir. Makes a full-bodied red wine in warm years. Promising in our grape trials, it should prove to be an excellent grape for the home gardener or winemaker. 1600-1900 GDD. (available June 2021)

**RONDO**

A very early ripening red wine grape of German origin. Full bodied with deep red color. Very winter hardy. Approximately 1600 GDD needed to ripen. (available June 2021)

**ZWEIGELT**

A recent Austrian cross. Makes an excellent fruity, Pinot-type wine. Very vigorous and highly productive, with very dark grapes. Tight clusters benefit from cluster thinning. Continues to gain sugar even in cool, wet falls. 1600-1900 GDD.

**MUSCAT OF NORWAY**

An early ripening red grape that has large berries in big clusters. This has performed well in the Northwest, needing under 1600 GDD to ripen. This small seeded grape is excellent for eating and also can be used to make a fruity blush wine.
notable fruits

This is an assortment of several unusual fruits that can be grown in cool summer climates. Most of these have strong ornamental qualities to complement their culinary attributes. The selections we carry are virtually pest-free and easy to grow. Enjoy!

chokeberry
(Aronia melonocarpa)
Hardy to Zone 3
EGERTA Extremely ornamental shrub that produces showy white flowers followed by very large astringent, sweet blue-black berries that make excellent preserves and juice and are extremely high in antioxidants. Fiery fall foliage is a bonus! Easy to grow. Tolerant of wet soil. Grows to 6. (pick up only)

elderberries
Hardy to Zone 5
- Varieties selected for best fruit
- 8’–10’ at maturity
- Full sun or partial shade
- For heavier fruiting, plant 2 varieties
- Available for pick up only

OLYMPIAN A great cool climate fig discovered in Olympia. Violet skinned figs have deep red flesh. Can ripen 2 crops in warmer sites.

York Our most productive variety with large, dark purple berries. Ripens mid-August.

NOVA Our most vigorous plant with large clusters of dark purple berries. Ripens mid-August.

asparagus
Hardy to Zone 2
JERSEY KNIGHT An all-male variety of asparagus that out-produces older varieties. It sets very few berries, meaning more energy goes into producing sweet edible stalks. Asparagus likes well-drained soil and ample moisture; amend the bed heavily with manure before planting. 2-yr.-old crowns.

OLYMPIAN A great cool climate fig discovered in Olympia. Violet skinned figs have deep red flesh. Can ripen 2 crops in warmer sites.

CRIMSON STAR (Also known as Wolfberry) An attractive 6’–10’ deciduous shrub that has light purple, bell-shaped flowers followed by bright red berries. The sweet, distinctive fruit has become famous lately for its antioxidant qualities. Sprawling, vine-like bushes. Full to part sun, well-drained soil. 1 gl. size plants.

goji berry
(Lycium barbarum) $22.95
Hardy to Zone 5

CRIMSON STAR (Also known as Wolfberry) An attractive 6’–10’ deciduous shrub that has light purple, bell-shaped flowers followed by bright red berries. The sweet, distinctive fruit has become famous lately for its antioxidant qualities. Sprawling, vine-like bushes. Full to part sun, well-drained soil. 1 gl. size plants.

figs
$19.95
Hardy to Zone 7
- Older fig trees are hardy to 10°F
- Best in warm, protected sites
- Try wrapping the fig trunk with closed-cell pipe insulation each winter
- 1 gl. size for shipping, larger sizes available for pick up only

DESERT KING Seems to be the most reliable and hardest fig for the Northwest. Green skin with strawberry flesh. Delicious fresh and good for drying. Ripens late July.

LATTARULLA Also known as the Italian Honey Fig. Green skinned, honey colored flesh. Very compact habit.

NEVERELLA (also called ‘OSBORNE PROLIFIC’) Productive fig, promising in tests at the Mount Vernon Fruit Research Station. Deep bronze to brown fig with pale amber flesh. Hardy for the Northwest.

honeyberry
(Lonicera caerulea var. edulis) $22.95
Hardy to Zone 3

BLUE HOKKAIDO Popular Japanese hybrid, with upright growth habit to 4’-5’, and large sweet-tart dark blue berries.

BLUE MOON Attractive spreading form, growing to 4’ high and wide with bright green foliage.

BLUE PAGODA Widely grown Japanese variety, with upright growth habit to 4’-5’, and large sweet crisp blue berries.

BLUE VELVET Spreading, low growing form with velvety gray-green foliage. Grows to 3’ high, 4’ wide.

NEVERELLA (also called ‘OSBORNE PROLIFIC’) Productive fig, promising in tests at the Mount Vernon Fruit Research Station. Deep bronze to brown fig with pale amber flesh. Hardy for the Northwest.
**Humulus lupulus ‘Centennial’ Hops**

$18.95

Hardy to Zone 5

A hops cultivar attractive to the home brewer for its aroma and brewing performance. Alpha acids 7-11%. Best in full sun and rich, well drained soil. Provide sturdy support. Hops die to the ground each winter. 1 gl.

**mulberry** $24.95

Hardy to Zone 5

**ILLINOIS EVERBEARING** Fruit quality is excellent for fresh eating and processing. Very precocious, bearing heavy crops at a young age. Fruits are 1½ long and wide. Ripens early July and continues through September. 1 gl. size plants.

**persimmon**

**IZU (Self-fertile)** An early ripening, non-astringent Asian persimmon that should perform well in our climate. Izu has medium-sized fruit with excellent flavor, ripening late October on a small tree (10–15'). Bring fruit inside before a hard freeze to continue ripening. Hardy to 0°F. (limited quantities, pick up only)

**quince** $29.95

Hardy to Zone 5

**AROMATNAYA (Self-fertile)** Sweeter than most quinces, excellent for preserves and cooking in both sweet and savory dishes. Upright habit. Ripens October. Very disease resistant.

**olive (Olea europea)** $24.95

Hardy to 10ºF

In much of Western Washington, olives are grown for their ornamental quality rather than for fruit. Olives may produce if planted in a warm enough site, such as against a south or west facing wall, or in large containers wintered inside. Needs well-drained soil. 1 gl. size plants.

**ARBEQUINA** (Self-fertile) A Spanish variety that is quite ornamental and early ripening in sites suitable for producing fruit. An evergreen tree, it grows to 10’–15’ in many years, with soft gray, willow-shaped leaves.

**NEW! STAR OF CRIMEA** Selected olive from the Nikita Botanical Garden on the Crimea Peninsula. An evergreen tree, it grows to 10’–15’ in many years with soft gray, willow shaped leaves. Uncertain whether self-fertile; best planted with a second variety for pollination if fruit is wanted.

**seaberry (Hippophae rhamnoides)** $15.95

Hardy to Zone 4

Also known as Sea Buckthorn, this large, nitrogen-fixing shrub slowly spreads by suckers. An excellent pollinator and good for anchoring slopes. Drought tolerant. Highest concentration of Vitamin C of any fruit. 1 gl. size plants. (limited quantities until late spring 2021)

**TITAN** (Female) Very large, flavorful berries are aromatic and bright orange. Grows best in sandy, well-drained soils, in full sun. Grows to 10’. Needs a male pollinizer to set fruit.

**MALE** A pollinizer for female Seaberry plants. One male can pollinize up to 8 female plants. A fine ornamental, with gray-green foliage and fuzzy brown flower buds in winter. Grows to 10’.

**tea (Camellia sinensis)** $22.95

Hardy to Zone 7

The plant from which green and black tea is made. A beautiful broadleaf evergreen shrub, growing to 6’–8’ with small, late fall flowers of fragrant white. Sun to partial shade, well-drained, acid soil. Seed sourced from a region in Korea known for its tea. 1 gl. size plant.

**rhubarb** $9.95

Hardy to Zone 3

**CRIMSON CHERRY** Deep-red stalks with rich flavor; great in pies and sauces. Very productive variety.

**yuzu (Citrus junos)** $27.95

The hardiest true citrus. Will survive short periods below 10°F. Small, seedy fruit has lemon-like juice and a rind strongly flavored like citron. Evergreen to 18°F. Worth trying outside in protected, milder areas of PNW. 1 gl. size plant.
The catalog has only a partial listing of what’s at the nursery! All plants are available for pick-up at the nursery. Only plants with a price and size can be shipped.

Our goal is to provide you with an extensive listing of well-grown, choice plants, many of which are truly unusual and merit attention in your garden.

### Flowering Garden Trees

**AMELANCHIER X GRANDIFLORA ‘AUTUMN BRILLIANCE’ SERVICEBERRY**

Hardy to Zone 5 Usually a multi-stemmed shrub, these serviceberries are trained to a tree form. Prolific starry white flowers are followed by small dark blue fruit that attracts birds. Showy fall color is a blend of orange, yellow, and red. Grows to 10’-15’ in 15-20 years, tolerant of both winter wet and summer drought. *(pick up only)*

**CERCIS CANADENSIS ‘FOREST PANSY’ REDBUD**

Hardy to Zone 4 Spring flowers of rosy-pink line the bare branches before the large heart-shaped leaves emerge in shimmering red-purple. Golden fall color and winter branching add interest. Grows to 20’; best with some protection from coldest winter winds. *(pick up only)*

### Cornus - Flowering Dogwoods

**Hardy to Zone 5**

The flowering dogwoods we carry are resistant to dogwood anthracnose, and perform best in rich, moist soil, in sun to part shade. Flowering dogwoods grow with spreading, layered habit. Their spring flowers are often followed by berry-like fruit that is a favorite of songbirds. They often have good fall color.

- **NEW! BLUE RAY** *(Cornus kousa)* A Chinese dogwood with prolific star shaped flowers of creamy white, blooming in late May to early June. The textural foliage has a slight blue cast, taking on red tones in fall. Slow growing, eventually 15’-20’ in height and spread. 3’-4’ Bare root - $79.95
- **SATOMI** *(Cornus kousa)* Deep-pink flowers bloom in June. Horizontal branching pattern and rich fall color add interest. Slow growing, eventually to 20’-25’ in height and spread. *(pick up only)*
- **SCARLET FIRE** *(Cornus kousa)* Scarlet Fire was selected for it’s deep fuchsia pink bracts which are pointed, and do not overlap, giving them the appearance of deep pink stars. Grows to 20’ in 20 years. 3’-4’ Bare root - $79.95
- **ROSY TEACUPS** This hybrid of Cornus kousa and Cornus nuttallii has wide, pink flowers with dark-pink edges. Slightly wider than tall, this dogwood should reach 20’ in 20+ years. Very disease resistant. 3’-4’ Bare root - $79.95
- **VENUS** An exciting new cross from Rutgers University, combining the large white flowers of our native Pacific Dogwood, Cornus nuttallii, with the disease resistance of the Chinese Dogwood, Cornus kousa. *(pick up only)*

### Magnolias

**Hardy to Zone 5**

- **GENIE** Deep maroon-purple blooms open over a long period of spring to early summer, often with a lighter second bloom in late summer. A compact, pyramidal form makes this magnolia suitable for smaller yards, growing to 10’ high, 6’-8’ wide in 10+ years. Hardy to Zone 5 *(pick up only)*
- **HONEY TULIP** A new magnolia from Felix and Mark Jury, suitable for smaller gardens, with an upright form to 12’. Golden goblet shaped flowers bloom in early spring. Hardy to Zone 5 *(pick up only)*
- **STELLA ‘ROYAL STAR’** A beautiful, slow growing magnolia, usually in multi-stemmed bush form, growing to 12’ high and wide in 25-30 years. Pure white, star shaped flowers bloom early, late March to early April. A Great Plants Pick. Hardy to Zone 5
- **MALUS - Scab-Resistant Flowering Crabapples for the Pacific Northwest**

These small garden trees provide spring flowers and ornamental, bird-loved fruit in summer and fall. They mature at 12’-15’ and are tolerant of a variety of soils. We have chosen cultivars that require little or no disease management. They can also act as pollinizers for fruiting apples with the same bloom time. *(pick up only)*

- **EVERESTE** Midseason blooming, the white flowers are followed by 1½’ tart red fruit that can be used for juice. The bright green foliage is very disease resistant.
- **PRAIRIEFIRE** Late season bloom of intense pink flowers followed by persistent, pea-sized, dark red fruit. The foliage emerges dark purple-red. Very disease resistant.

**OXYDENDRUM ARBORETUM – SOURWOOD**

**Hardy to Zone 5**

STEWARTIAS
Small, four-season garden trees that have it all: picturesque branching, summer flowers, fall color, and winter bark interest.

• monadelpha ORANGEBARK STEWARTIA Small, white, camellia-like flowers bloom in June. Wine-red fall color. Beautiful flaking, reddish tan bark. Slow growing tree, maturing at 15’-20’. Hardy to Zone 6. (pick up only)

• pseudocamellia JAPANESE STEWARTIA This magnificent tree bears scented, white, camellia-like flowers, appearing in July. Fall foliage is subtle shades of red, orange, and pink. The bark pattern provides interest year-round. Slow growing, to 25’ in many years. Hardy to Zone 5. 3’-4’ Bare root - $29.95 (larger sizes available for pick up only)

STYRX JAPONICUS JAPANESE SNOWBELL
Hardy to Zone 5
In early summer, white tubular, slightly fragrant flowers hang below the branches. Trunk is slender, often twisted in later years. Leaves are oval and dark green with scalloped edges, turning yellow in fall. Grows slowly to 20’ in 20 years. Hardy to Zone 6. (pick up only)

learning from our experience STEWARTIAS
Stewartias are one of the most beautiful garden trees for our climate, and can provide year round beauty in the right site with their summer flowers, fall foliage color and lovely winter bark and form. They are not drought tolerant, so in well-drained soils, even established trees need supplemental water. Their best site is a north or east exposure with cool, organic rich soils.

garden trees for foliage & form

• Varieties native to PNW

ACER CIRCNATUM VINE MAPLE Hardy to Zone 6
Slow growing, to 20’ at maturity. Light green leaves turn brilliant shades of yellow, orange, and red in the fall. 1 gl. - $14.95 (larger sizes available for pick up only)

ACER CRATAEGIFOLIUM 'VEITCHII' VARIEGATED HAWTHORN MAPLE Hardy to Zone 6
A small-growing tree for shade to part shade, Veitchii has delicate green leaves streaked with white. The foliage turns golden yellow to red in the fall. Grows to 12’ in 10 years, eventually to 18’. A Great Plant Picks selection. (pick up only)

ACER GRISOUM PAPERBARK MAPLE Hardy to Zone 4
One of the best trees for year-round interest. Leaves are three-lobed and medium green, turning brilliant shades of red and orange in fall. In winter, curls of purple-brown bark peel from its trunk and branches to expose the glistening orange-cinnamon inner bark. Grows to 20’-25’. (pick up only)

ACER PSEUDOPLATANUS 'ESKIMO SUNSET' SYCAMORE MAPLE Hardy to Zone 4
A bold, variegated form of Sycamore maple, with bright splashes of pink, maroon, and cream on the green leaves. Grows to 10’ in 10 years, eventually reaching 25-30’. This tree stops traffic. (pick up only)

ACER RUBRUM 'MAGNIFICENT MAGENTA' BURGUNDY BELLEDER MAPLE Hardy to Zone 4
Very symmetrical branching habit with fall color that turns from brilliant red to intense burgundy. Fantastic fall color sets this Red Maple apart. Tolerant of winter wet soil and summer drought. Grows to 25’ in 20 years, eventually to 50’. (pick up only)

BETULA NIGRA 'HERITAGE' RIVER Hardy to Zone 4
Very symmetrical branching habit with fall color that turns from brilliant red to intense burgundy. Fantastic fall color sets this Red Maple apart. Tolerant of winter wet soil and summer drought. Grows to 25’ in 20 years, eventually to 50’. (pick up only)

CARPINUS JAPONICA JAPANESE HORNBEAM Hardy to Zone 4
Very symmetrical branching habit with fall color that turns from brilliant red to intense burgundy. Fantastic fall color sets this Red Maple apart. Tolerant of winter wet soil and summer drought. Grows to 25’ in 20 years, eventually to 50’. (pick up only)

CERCIDIPHYLLUM JAPONICUM KATSURA Hardy to Zone 5
An elegant Asian tree. Leaves are heart-shaped and emerge lime-green suffused with pink, turning a kaleidoscopic range of yellow, crimson, orange, pink and red in the fall.

• MORIOKA WEEPING A graceful weeping form of Katsura. Grows into a wide, rounded mound, maturing at 25’-30’ high and 20’ wide. 3’-4’ Bare root - $42.95 (larger sizes available for pick up only)

• SEEDLING At first columnar, then spreading and horizontally branching with age. (pick up only)
**ORNAMENTALS**

**FAGUS SYLVATICA ‘RED OBELISK’ BEECH**
Hardy to Zone 5
A columnar form of beech with dark purple, dissected leaves that emerge in spring like purple-black feathers. Grows to 12' high and 3' wide in 10 years. (pick up only)

**FAGUS SYLVATICA ‘PURPLE FOUNTAIN’ WEEPING BEECH**
Hardy to Zone 5
This purple leafed Beech grows with a very narrow form, maturing at about 12' high and 3' wide in many years. A Great Plant Picks selection. 2'-3' Bare root - $39.95

**PARROTIA PERSICA ‘VANESSA’ PERSIAN IRONWOOD**
Hardy to Zone 4
A beautiful deciduous tree known for its spectacular fall color. Graceful winter form and spidery winter flowers are also notable. Vanessa was selected for its narrower form; a 10-year-old tree may reach 10’–15’ high and 10’ wide. A Great Plant Picks selection. (pick up only)

**QUERCUS GARRYANA OREGON WHITE OAK**
Hardy to Zone 7
Fast growing oak, matures at 50’–60’ with rounded crown. Bronze-red to bright red fall color. Full sun, well-drained soil. (pick up only)

**RHAMNUS (FRANGULA) PURSHIANA CASCARA**
Hardy to Zone 6
Small, upright tree with large, glossy green leaves that develop good fall tones most years. Tolerant of wet or dry sites but prefers some shade. 1 gl. Size - $15.95

**japanese maples**

Every yard or landscape can benefit from the addition of these truly elegant garden trees that are somewhat drought tolerant once established, and not appealing to deer. The selections of Acer palmatum, Acer japonicum, and Acer shirasawanum below are a sample of what is available at the nursery. Prices are given for shippable, 1 gallon-sized trees, more sizes available for pick up at [www.cloudmountainfarmcenter.org](http://www.cloudmountainfarmcenter.org). Zones 5–8

**laceleaf japanese maples**

- **FAIRY LIGHTS** (Acer japonicum) A dwarf form with highly cut leaves, growing to 5' high and wide over time. Very lacy green summer foliage turns brilliant shades of orange to scarlet in fall. 1 gl. - $49.95; (larger sizes available for pick up.)
- **GARNET** A vigorous cultivar that forms a beautiful, cascading mound-shaped specimen, this maple is distinguished by its leaf color—the deep orange-red of the gemstone garnet. This color develops best when grown in sun. Grows to 9'. (pick up only)
- **HANA MATOI** A variegated laceleaf maple, with leaves of deep red that emerge splashed in pink and cream. The foliage background changes to deep green in summer shade. Mounded form, growing to 4' high and 5' wide in 10–15 years. 1 gl. - $49.95 (larger sizes available for pick up)
- **ORANGEOLA** Finely cut leaves emerge orange-red in spring, changing to bronze-green in summer, then a brilliant red-orange in fall. Slow grower, reaching 5’–8’ in 10+ years. A Great Plant Picks selection. (pick up only)
- **RED DRAGON** An excellent red laceleaf maple. The color is quite bright, and the plant grows quickly when young to make a beautiful focal point in your garden. (pick up only)
- **SPRING DELIGHT** A beautiful laceleaf Japanese maple with leaves that emerge peach toned, then mature to bright green. Fall colors are a blend of brilliant orange and red. Good sun tolerance. Mounded form, growing to 6’. (pick up only)

**classic japanese maples**

- **DANCING PEACOCK** (Acer japonicum Aconitifolium) Also known as the ‘Fern Leaf’ maple. An upright form of Acer japonicum, with finely cut green leaves that turn scarlet in fall. This vigorous grower can reach 15’–18’. Tolerates full sun or part shade. A Great Plant Picks selection. (pick up only)
- **AKA KAWA HIME** This moderate-sized maple has bright red bark in the winter. Lime-green leaves turn golden and orange in autumn. Grows to 6–8 feet in 10 years. (pick up only)
- **AMBER GHOST** Foliage emerges bright red, then fades to pinkish amber, and matures to golden green with strong veining. Fall colors are golden-orange. Grows to 8' in 10 years. (pick up only)
- **AOYAGI** Known to some as the ‘Green Coral Bark’ Maple, with bright pea-green wood for winter interest. It has light-green foliage, turning bright golden in fall. Upright in habit, it grows to 8’ in 10+ years, eventually to 15’–18’. Prefers part shade. (pick up only)
- **BENI KAWA** This spectacular maple is prized for its salmon-red bark, brighter than other coral bark maples. The small green leaves are edged in red when they first emerge in spring. Fall color is bright yellow. Upright habit, grows to 10’. 1 gl. - $49.95 (larger sizes available for pick up only)
- **EMPEROR** A vigorous, upright cultivar with deep purple-red foliage that holds its color all summer. Grows to 18’–20’ in 10+ yrs. A Great Plant Picks selection. 1 gl. - $49.95 (larger sizes available for pick up only)
**choice ornamentals & hardy fruits**

- **HOGYOKU** Upright, spreading form with large green leaves that turn brilliant orange in autumn. Grows to 15’ at maturity. Sun tolerant. 1 gl. - $49.95 (larger sizes available for pick up only)

- **HUBB’S RED WILLOW** A great willow-leaved cultivar, this small tree is vase-shaped, with long thin leaves of purple-red, turning brighter red in fall. Slow growing, to 7’ in 10 years. Sun tolerant. (pick up only)

- **KI HACHIO** A sturdly upright tree, maturing at 10’–12’. Green summer leaves develop a distinctive fall coloration of golden yellow suffused with rosy overtones, blending into light orange and red. The bark is green, striped white. Sun to part shade. (pick up only)

- **MATSU KAZE** A graceful tree, as wide as tall, with deeply divided spring leaves of purplish red that gradually change in summer to bronze green. Fall color is a spectacular orange red. Vigorous habit, grows to 15’. Good in full sun. (pick up only)

- **MORNING SONG** A red-leafed, slightly weeping form of Japanese maple, with branches that arch up then weep down. The deeply divided leaves emerge maroon, turning crimson in fall. 10’ high and wide at maturity. Pea green bark adds winter interest. Sun or part shade. 1 gl. - $49.95

- **OTAKI** This cultivar of A. japonicum has a wider than tall habit, eventually reaching 10’–12’. Large rounded leaves are rich green in summer, turning shades of red, gold, and orange in fall. (pick up only)

**dwarf japanese maples**

- **ARATAMA** A dwarf shrub maple, growing to 3’–4’ in 10 years. Bright red new growth, becoming bronze-green in summer. The fall color is bright crimson. Sun tolerant. (pick up only)

- **BONFIRE** Brilliant crimson leaves emerge in spring, then slowly turn green in summer. The fall tones are scarlet. An upright stocky habit, growing to 5’–6’ in 10 years. (pick up only)

- **CORAL MAGIC** Deep coral-pink leaves emerge in spring, slowly maturing to green in summer, then a stunning orange in fall. A semi-dwarf cultivar growing only to 6’ in 10-15 years. (pick up only)

- **JERRE SCHWARZ** A shrubby dwarf maple with deeply divided leaves that emerge pinkish red. Summer color is a mix of green and red; more red in sun. Grows to 4’–5’ high and wide in 10 years. (pick up only)

- **KATSURA HIME** Leaves emerge peachy orange, edged in red, then slowly turn to light green. The fall colors are a blend of gold and orange. New wood is touched in coral-orange. A slow-growing, upright form, to 8’ high in 10 years. Best with afternoon shade. (pick up only)

- **MIKAWA YATSUBUSA** A beautiful dwarf with leaves that emerge light green with bright red tips, changing to bright green in summer. The leaves appear to be shingled on the branches. Matures at 5’ high and wide. (pick up only)

- **MURASAKI KIYOHIME** A wonderful dwarf Japanese maple. Small green leaves emerge edged in red. In fall, the tree turns golden, touched with orange and red. It grows to 3’–4’ high, 6’–8’ wide. (pick up only)

- **OTAME ZAKURA** Celebrate spring by planting this small, shrubby tree. The leaves unfold a brilliant scarlet-pink, later fading to bluish pink and green. Both large and small leaves decorate every branch. Color intensifies in fall. Grows eventually to 8’ high. 1 gl. - $49.95 (larger sizes available for pick up only)

- **RUSLYN IN THE PINK** This dwarf maple grows to 6’ high, 4’ wide in 10 years. Grow it for the brilliant hot pink spring foliage, which becomes green in summer. The fall tones are bright crimson-red. 1 gl. - $49.95 (larger sizes available for pick up only)

- **SHAINA** The leaves emerge a purple-red in spring and hold the color through summer. Fall colors are crimson touched in orange. Slow growth to 4’–5’, as wide as tall. A Great Plant Picks selection. (pick up only)

- **TATTOO** A dwarf shrub form with a spreading habit. Small green leaves have a purple edge in spring and summer. Fall color is yellow to orange. 4’ wide by 3’ tall in 10 years. (pick up only)

- **VILLA TARANTA** Delicate, airy appearance, but a very sturdy Japanese maple. Distinctive, long thin leaves of light green touched in red turn gold and orange in fall. Narrow upright habit, maturing at 5’–6’. Part shade or sun. (pick up only)
**ORNAMENTALS**

**variegated or unusual foliaged maples**

- **ARIADE** A colorful maple through the seasons, with leaves emerging orange-pink with golden veining, maturing to red with deep-purple veining. Fall colors are a blend of flame red with gold and orange. A small spreading habit, to 6’–8’ high and wide. *(pick up only)*

- **COTTON CANDY** Leaves are strongly variegated, splashed with pink and white. Upright vase shaped habit, growing to 6’–8’ in 10 years. 1 gl. - $49.95; *(larger sizes available for pickup)*

- **FIRST GHOST** Spring color of nearly white leaves with deep-green veins and red tips. The color holds well into the summer. Fall color is yellow to orange. Grows to 7’ high, 4’ wide in 10–11 years. Best with afternoon shade. *(pick up only)*

- **OLSEN’S FROSTED STRAWBERRY** A colorful Japanese maple with leaves that emerge strawberry pink, frosted with cream. In sun, the leaves hold their color, and will be veined in green and silver. Upright and vigorous, growing to 8’ in 10 years. *(pick up only)*

- **OKUSHIMO** The bright green leaves are star shaped with the margins curled upward. Bright orange-gold fall color. Very narrow, upright vase-shaped habit. Grows to 15’; tolerant of full sun. *(pick up only)*

- **SHISHIGASHIRA** Lions Head Maple This upright maple carries its crinkled, bright green leaves quite close to the branch. Fall coloration is striking gold and crimson. Slow growing to 8’–12’ high & wide, depending on culture. Sun tolerant. A Great Plant Picks selection. *(pick up only)*

- **SISTER GHOST** Spring leaves emerge a pale yellow-green and develop prominent veining (reticulation) as they mature. The fall color is bright golden-yellow. Sister Ghost should reach 7’–8’ in 10 years, as wide as tall. Needs some shade. *(pick up only)*

- **UKIGUMO** The “Floating Cloud” Maple, one of the most beautiful of the variegated Japanese maples. The green leaves are heavily marked in pink and white, turning pink in fall. Best in part to full shade. Matures at 8’–10’. A Great Plant Picks selection. *(pick up only)*

- **WILL’S DEVINE** A variegated maple with deeply divided leaves that go through many color changes. The green leaves have a reticulated pattern of white, pink, and coral tones. A spreading, shrubby habit, growing eventually to 8’. Best in part shade. *(pick up only)*

- **AUREUM GOLDEN FULLMOON MAPLE** *(Acer shirasawanum)* The leaves emerge in spring as round orbs of soft yellow-green. The pale leaves turn shades of yellow and orange to red in fall. Best with part to full shade. Slow growing to 5’ in 10 years. 1 gl. - $49.95 *(larger sizes available for pick up only)*

- **AUTUMN MOON FULLMOON MAPLE** *(Acer shirasawanum)* The leaves emerge in spring as round orbs of soft yellow-green. The pale leaves turn shades of yellow and orange to red in fall. Best with part to full shade. Slow growing to 5’ in 10 years. 1 gl. - $49.95 *(larger sizes available for pick up only)*

**acer circinatum - vine maple**

Our native relative of the beautiful Japanese maples, vine maples have delicate branching, and wonderful fall color. We carry both seedling trees and selected cultivars. Best in part shade. Hardy to Zone 6

- Varieties native to PNW

- **BURGUNDY JEWEL** A red-leafed vine maple! Leaves emerge purple-red, and hold that color through the summer when planted in sun. Smaller than seedling vine maples, Burgundy Jewel will reach 6’–8’ in 10 years. *(pick up only)*

- **DEL’S DWARF** New growth emerges bronze, changing later to deep green, then taking on fall tones of yellow, red, and orange. A slow-growing form of vine maple, reaching only 3’ high in 10 years. *(pick up only)*

- **MONROE** Finely cut leaves and an open, airy form. Yellow fall tones. A slow-growing tree, eventually reaching 10’ high and wide. Best in part to full shade. A Great Plant Picks selection. *(pick up only)*

- **SUNNY SISTER** A selected form of vine maple with stunning coral spring color. Slow growing, it should reach 6’–8’ in 10+ years. 1 gl. - $49.95 *(larger sizes available for pick up only)*

- **SEEDLINGS** Light green leaves turn brilliant shades of yellow, orange, and red in the fall. Slow growing, to 20’ at maturity. 1 gl. - $14.95 *(larger sizes available for pick up only)*
broadleaf evergreen shrubs

- Varieties native to PNW

**ARBUTUS UNEDO ‘COMPACTA’ STRAWBERRY TREE**
Hardy to Zone 7
Evergreen large shrub or small tree, grows to 8’ in 10 years. White, bell-like flowers bloom mid-spring, followed by ornamental, strawberry-like fruit. Best in well-drained soil, sun to full shade. Drought tolerant when established. A Great Plants Pick selection. (pick up only)

**ARCTOSTAPHYLOS COLUMBIANA HAIRY MANZANITA**
Hardy to Zone 7
Pacific Northwest native evergreen shrub, can grow to 6’ or more, usually smaller. Gray green leaves and cinnamon bark. Needs good drainage and protection from NE winds. Drought tolerant. 1 gl. - $19.95 (larger sizes available for pick up only)

**AUCUBA JAPONICA ‘ROZANNE’ JAPANESE AUCUBA**
Hardy to Zone 6
A slow-growing evergreen shrub, reaching 3’ high and wide in 10 years. The deep green leaves are adorned with red berries in the fall, even without a male plant nearby. Tolerates sun to deep shade, deer resistant. Hardy to Zone 6. 1 gl. - $15.95 (larger sizes available for pick up only)

**AZARA MICROPHYLLA BOXLEAF AZARA** Hardy to Zone 7
Highly textural evergreen with tiny, glossy leaves. Upright growing, protect from NE winds. 1 gl. - $15.95

- **GREEN AZARA** Dark green leaves and minute, yellow, chocolate-scented winter flowers. A narrow upright tree. Grows to 10’–15’.
- **VARIEGATA** Dark green finely textured foliage is splashed in white on this small evergreen tree, which can grow to 15’. Less upright that the green form. Tiny inconspicuous chocolate-scented flowers in late winter.

**BERBERIS REPLICATA LONGLEAF EVERGREEN BARBERRY**
Hardy to Zone 7
A beautiful evergreen barberry with long, narrow leaves. The foliage emerges purple-red in spring, retaining a red blush through the summer. The early spring flowers are bright orange-yellow. Full sun, average soil. Grows to 6’ 1 gl. - $15.95 (larger sizes available for pick up only)

**CALLISTEMON PITYOIDES ‘MT. KOSCIUSCO FORM’ ALPINE BOTTLEBRUSH**
Hardy to Zone 7
Compact growth of narrow, silky foliage. June brings bottlebrush flowers of creamy yellow. Needs well-drained, lean soil and full sun. Grows to 2’–3’ high and wide. (pick up only)

**CALLUNA VULGARIS ‘GOLD HAZE’ SCOTCH HEATHER**
Hardy to Zone 5
Grows to 12’ high, 18’ wide. Bright gold foliage and white flowers in August. Full sun, average soil. Shear in spring for compactness. Great for pollinators. 4’ pots - $7.95

**CAMELLIA JAPONICA ‘GLEN 40’**
Hardy to Zone 7
Large, double deep-red flowers are very formal rose-form, complementing the deep-green foliage. Upright in form and compact in habit, reaching 6’ in 10–15 years. Best in well-drained soil and afternoon shade. Very prolific bloom. (pick up only)

**CAMELLIA SASANQUA ‘KANJIRO’**
Hardy to Zone 7
Deep cherry pink, semi-double flowers are accent by a puff of golden stamens in the flower center, and have a hint of fragrance. Fall to winter bloom. Spreading, almost weeping form with deep green foliage. reaching 8’ high and wide in 10–15 years. Best in well-drained soil and afternoon shade. (pick up only)

**CAMELLIA SINENSIS TEA**
Hardy to Zone 7
This is the plant from which green and black tea is made. A beautiful broadleaf evergreen shrub, growing to 6’–8’, with small, late fall flowers of fragrant white. Full sun to partial shade, well-drained, acid soil. These are seedlings from a tea plantation in Korea. Excellent tea quality and productive. 1 gl. - $22.95

**CEANOTHUS THYSIFOLIA CALIFORNIA WILD LILAC**
Hardy to Zone 7
This evergreen shrub is tolerant of drought and salt spray, loved by pollinators, and deer resistant. Best in full sun and fast draining soil with limited summer water.

- **COOL BLUE** Variegated evergreen foliage highlighted in early summer with pale blue flowers. Smaller growing than Victoria, Cool Blue will grow to 3’–4’ wide and 5’–6’ tall in 10 years. A Sunset Garden Collection plant. 1 gl. - $15.95
- **VICTORIA** Proven for our climate. Victoria grows quickly to 6’ high 8 wide, and can be sheared for a more compact form. Masses of dark blue flowers in spring. 1 gl. - $15.95 (larger sizes available for pick up only)

**CISTUS X ‘GRAYSWOOD PINK’ ROCKROSE**
Hardy to Zone 7
Soft, gray foliage topped by medium-pink flowers in June. Spreading, mounded form grows to 2’–3’. Full sun, well-drained soil. Deer resistant! 1 gl. - $15.95 (larger sizes available for pick up only)

**CHOISYA TERNATA MEXICAN MOCK ORANGE**
Hardy to Zone 7
This evergreen shrub is good in informal hedges or in a mixed-shrub border. Fragrant white flowers in early to mid-spring. Sun to part shade. All varieties grow to 6’–8’ high and wide and can be kept smaller through pruning. Deer resistant. We offer 3 cultivars. 1 gl. - $15.95 (larger sizes available for pick up only)

**COTONEASTER LACTEOS PARNEY COTONEASTER**
Hardy to Zone 7
Evergreen shrub grows to 6’–8’ with elegant arching branches. Subtle white June flowers are followed by showy red berries. For full sun or light shade, well-drained soil. Best with some protection from strong winter winds. (pick up only)

**COTONEASTER LACTEOS PARNEY COTONEASTER**
Hardy to Zone 7
This is the plant from which green and black tea is made. A beautiful broadleaf evergreen shrub, growing to 6’–8’, with small, late fall flowers of fragrant white. Full sun to partial shade, well-drained, acid soil. These are seedlings from a tea plantation in Korea. Excellent tea quality and productive. 1 gl. - $22.95

**COTONEASTER LACTEOS PARNEY COTONEASTER**
Hardy to Zone 7
This is the plant from which green and black tea is made. A beautiful broadleaf evergreen shrub, growing to 6’–8’, with small, late fall flowers of fragrant white. Full sun to partial shade, well-drained, acid soil. These are seedlings from a tea plantation in Korea. Excellent tea quality and productive. 1 gl. - $22.95
ORNAMENTALS

DAPHNE ODORA ‘MAE-JIMA’ VARIEGATED WINTER DAFFINE  
Hardy to Zone 7  
The evergreen leaves are edged in creamy gold. Pink buds open to intensely fragrant light pink flowers in late February through March. Best in afternoon shade, protected from cold winter winds. Grows to 4’ high, 5’ wide. Well-drained soil is essential. 1 gl. - $24.95

GARRYA ELLIPITICA ‘JAMES ROOF’ SILKTASSEL  
Hardy to Zone 7  
Native to the PNW coast, this evergreen shrub has showy, long winter catkins of soft yellow. Sun to part shade, most soils, protect from severe NE winds. 1 gl. - $16.95

GARRYA X ISSAQUAHENSIS ‘GLASNAVIN WINE’ SILKTASSEL  
Hardy to Zone 7  
A hybrid between 2 west coast natives, this large evergreen shrub is slightly harder than Garrya elliptica. Wine-red stems with deep-green wavy leaves are highlighted in late winter by 3’-4’ long bloom chains. Can reach 10’-12’ high and wide. Drought tolerant once established. 1 gl. - $16.95 (limited quantities)

GAULTHERIA SHALLON SALAL  
Hardy to Zone 3  
Evergreen groundcover. Grows in sun or shade, prefers rich, organic, moist soil. Grows to 2’–3’ high. Spreads by underground runners. 1 gl. - $12.95

GREVILLEA VICTORIAE ROYAL GREVILLEA OR SILK OAK  
Hardy to Zone 7  
Silvery evergreen foliage and early spring flowers of reddish orange. Very attractive to hummingbirds. Grows to 8’ high and wide. Best in full sun, well-drained soil. (available early summer 2021)

MAHONIA NERVOSA LOW OREGON GRAPE  
Hardy to Zone 6  
This hybrid mahonia has soft evergreen leaves, topped with spikes of cheerful yellow flowers fall through winter. A mounded form growing to 3’ high and wide in time. Best in part sun to full shade, with rich moist soil, and protected from severe NE winter winds. (pick up only)

HEBE  
Hardy to Zone 7-8  
Evergreen shrubs for sun to part shade, and well-drained soil. Protect from cold winter wind. (available early summer 2021)

• PIMELEOIDES QUICKSILVER  
Tiny silver leaves on arching black branches give this small evergreen a distinctive look. Smoky pink flowers bloom early summer. Grows to 1’ high, 2’ wide.

• BLUE MIST  
Evergreen shrub to 3’ high and wide. Pale blue flowers in spring fade to white.

MAHONIA AQUIFOLIUM ‘COMPACTA’  
OREGON GRAPE  
Hardy to Zone 6  
A selected form of Oregon grape; grows to about 2 - 3 ft. tall and spreading. Dark green spiny foliage is a fine background for the bright yellow flowers in spring. Clusters of blue berries follow. Drought and deer tolerant. . (pick up only)

LEPTOSPERMUM LANIGERUM WOOLLY TEA TREE  
Hardy to Zone 7  
Interesting evergreen shrub from Tasmania. Tiny silvery foliage gives the shrub a woolly look. Prolific white flowers in mid-spring are attractive to pollinators. Full sun, drought tolerant. Grows to 12’ high, 10’ wide, can be sheared. 2 gl. - $29.95 (limited quantities)

LONICERA CRASSIFOLIA CREEPING EVERGREEN HONEYSUCKLE  
Hardy to Zone 8  
A groundcover honeysuckle with rounded, evergreen leaves. Tiny, cream-colored flowers bloom in late spring and are followed by ornamental blue berries. Full sun to partial shade, moist, organic rich soil. Our plant has easily survived temperatures of -5˚ F. Hardy to Zone 7. 4” pots - $7.95 (limited quantities)

LONICERA NITIDA ‘RED TIP’ BOX HONEYSUCKLE  
Hardy to Zone 6  
Evergreen shrub with erect, leafy branches and dark green shiny leaves. New growth is bronzy red and turning bronze in winter. Fragrant June flowers followed by translucent blue berries. Grows to 6’ unpruned; can be sheared lower. 1 gl. - $13.95 (larger sizes available for pick up only)

LONICERA PILEATA PRIVET HONEYSUCKLE  
Hardy to Zone 6  
Evergreen shrub with early spring yellow flowers followed by blue berries. Grows to 6’–8’ and slowly spreads by underground runners. (pick up only)

MAHONIA AQUIFOLIUM TALL OREGON GRAPE  
Hardy to Zone 6  
Evergreen shrub with early spring yellow flowers followed by blue berries. Grows to 6’–8’ and slowly spreads by underground runners. (pick up only)

MAHONIA EURYBRACTEATA ‘SOFT CARESS’ MAHONIA  
Hardy to Zone 6  
This hybrid mahonia has soft evergreen leaves, topped with spikes of cheerful yellow flowers fall through winter. A mounded form growing to 3’ high and wide in time. Best in part sun to full shade, with rich moist soil, and protected from severe NE winter winds. (pick up only)

MAHONIA X MEDIA ‘CHARITY’ HYBRID MAHONIA  
Hardy to Zone 7  
Bold evergreen shrubs growing to 8’–10’ in time. Vertical stems hold horizontal branches with spikes of fragrant yellow flowers in winter. Overwintering hummingbirds love November-December flowers. Deer resistant! A Great Plant Picks selection. 2 gl. - $24.95 (larger sizes available for pick up only)

MAHONIA NERVOSA LOW OREGON GRAPE  
Hardy to Zone 6  
Evergreen groundcover growing to 18’. Spreads by underground runners. Winter flowers of yellow, blue berries in summer. Shade to partial shade, humusy soil. A Great Plant Picks selection. 4” pots - $3.95
MORELLA CALIFORNICA PACIFIC WAX MYRTLE
Hardy to Zone 7
(Previously ‘Myrica’) Coastal area native evergreen shrub. In sheltered areas, grows to 20’–30’; much smaller in windy sites. Drought, salt, and deer tolerant. A Great Plant Picks selection. 1 gl. - $16.95 (larger sizes available for pick up only)

NANDINA DOMESTICA ‘BURGUNDY WINE’ HEAVENLY BAMBOO
Hardy to Zone 6
A compact heavenly bamboo noted for its deep wine-red new foliage, contrasting with the older green foliage. The foliage turns red-orange in fall. White flowers in spring are followed by small white berries. Grows to 3’-4’ tall and 2’-3’ wide. 2 gl. - $32.95

OSMANTHUS X BURKWOODII FRAGRANT OSMANTHUS
Hardy to Zone 7
Good hedge plant. Grows to 6’-8’ high and is easily pruned. Intensely fragrant white flowers in early spring. Sun or shade, tolerant of most soils. (pick up only)

PIERIS JAPONICA PIERIS
Hardy to Zone 6
Evergreen shrubs with early spring bell-like flowers and colorful new foliage. Deer resistant! 2 gl. - $29.95 (larger sizes available for pick up only)

• KATSURA Sprays of rose-pink, bell-shaped flowers bloom in early spring followed by emerging foliage of burgundy red, which matures to deep green by midsummer. Growing to 5’ high and wide in 10-15 years.

• MOUNTAIN FIRE White flowers followed by intensely orange-red new foliage that holds its color into summer. Grows to 4’–5’.

• PRELUDE Dwarf form, beautiful, deep green foliage with pink buds open to sprays of white bell-like flowers followed by new pinkish-red foliage. Slow-growing to 2’ high and wide.

PROSTANTHERA CUNEATEA ALPINE BUSH MINT
Hardy to Zone 7
Evergreen shrub with aromatic, deep green, tiny foliage. Grows to 2’–3’ high and wide. The summer flowers are white tubular bells with purplish throats. Drought tolerant and deer resistant. 1 gl. - $16.95

SARCOCOCCA SWEET BOX
Winter- to early spring-blooming evergreen shrubs for shade to part shade, rich soil, and average water.

• CONFUSA
Hardy to Zone 6 Glossy evergreen leaves adorned by early spring flowers of fragrant white, followed by black fruit. Slow growing to 4’-6’ high and wide. 2 gl. - $29.95

VACCINIUM OVATUM EVERGREEN HUCKLEBERRY
Hardy to Zone 6
Produces a multitude of white or pinkish bell-shaped blossoms in April and May, and tasty blue-black berries in August and September. Prefers a shady environment but can take full sun in cooler areas. Erect shrub grows 8’-10’ in partial shade. 4’–5’ in full sun. Prefers acid soil and mulched roots. 1 gl. - $16.95

VIBURNUM TINUS ‘COMPACTA’ LAURUSTINUS VIBURNUM
Hardy to Zone 7
Deep green leaves are adorned by fragrant white flowers opening from pink buds. Excellent hedge plant and deer resistant. Best in full sun to dappled shade. Grows to 6’-8’ high and wide in time. A Great Plant Picks selection. 1 gl - $15.95 (larger sizes available for pick up)
Conifers add year-round interest to the garden with a variety of color, texture, and form. We give approximate sizes and growth rates for conifers in our maritime climate—they may grow differently outside the PNW.

How big will it get? This is a common question from conifer shoppers. There is no hard and fast answer because conifers continue to grow as long as they are alive—and they can live a very long time. Size can also vary due to cultural conditions.

**ABIES BALSAMEA 'NANA'DWARF BALSAM FIR**
Hardy to Zone 5
(Dwarf) Deep-green needles densely clothe this wider-than-tall conifer. Slow growing, it will reach 15’ high, 18” wide as a ten–year-old plant. 1 gl. - $19.95

**ABIES KOREANA KOREAN FIR**
Hardy to Zone 5
Korean Fir has many cultivars, from miniature to large, from silvery to blue-green to deep green. All thrive in sun.

- **BLAUER ESKIMO (Miniature)** A flattened-globe form of Korean Fir with blue-green needles. Grows less than 2” per year. Best color in full sun. 1 gl. - $34.95 (larger sizes available for pick up only)
- **OBERON (Dwarf)** Irregular, mounding shape, growing 2”–3” per year. Named for Shakespeare’s King of Fairyland in honor of its regal but dwarf form. 10-year size 18” high, 24” wide. (pick up only)
- **SILBERPERL (Miniature)** A very dwarf, flattened-ball-shaped conifer with green needles that curve upward and show their silvery undersides. Grows ½” per year. (pick up only)
- **SILBER MAVERS (Miniature)** A very dwarf, globe-shaped conifer with dark green needles that curve upward to show their silvery undersides. Grows ½” per year. A great rockery or trough conifer. Full sun, well-drained soil. (pick up only)
- **STARKERS DWARF (Dwarf)** (Dwarf) Dense, irregular, upright form with deep-green needles. Begins as almost prostrate, then gradually becomes upright with age. Grows 4”–6” per year. (pick up only)

**ABIES NORMANNIANA ‘MUNSTERLAND’**
Hardy to Zone 4
(Dwarf) Deep green needles on a flat-topped miniature conifer. Grows 1”–2” per year; a 10-year-old plant could reach 10’ tall by 24” wide. Full sun. (pick up only)

**ABIES PINSapo ‘AUREA’ GOLDEN SPANISH PIN FIR**
Hardy to Zone 6
(Intermediate) Very striking conifer with golden yellow tips on blue-gray needles. Narrow and irregular form; it will grow 6”–8” per year. Best in full sun and well-drained soil. 2 gl. - $39.95 (larger sizes available for pick up only)

**ARAUCARIA ARAUCANA MONKEY PUZZLE TREE**
Hardy to Zone 7
(Large) A unique and interesting South-American conifer that is fast-growing once established, growing more than 12” per year. Huge cones add interest. Prefers full sun to partial shade, and deep, moist, well-drained soil. (pick up only)

**CALLITROPIS NOOTKATENSIS –ALASKAN YELLOW CEDAR**
Hardy to Zone 4 (Chamaecyparis nootkatensis) Native to the Pacific Northwest and up the coast into Alaska.

- **GLAUCAs PENDULA (Intermediate)** Graceful form with bluish, slightly weeping foliage; slow growing to 30’. Grows to 8’–10’ in 10 years. (pick up only)
- **SEEDLING (Intermediate)** Seedling form, plants will vary from gray-green to slightly blue-gray, and in the degree of weeping the mature tree shows. Slow growing, 8’–10’ per year. 1 gl. size - $19.95

**CEDRUS DEODARA DEODAR CEDAR**
Hardy to Zone 6 True deodar cedars are conifers that tolerate sun, drought, and deer pressure. They also tolerate most soil types and have few pest problems.

- **DEVINELY BLUE (Dwarf)** Dense blue foliage on a mounded form, growing 3”–6” per year. It eventually forms a leader, becoming a broad cone. (pick up only)
- **FEELING BLUE (Dwarf)** Powder-blue foliage shines on this prostrate cedar. It grows 3”–4” per year. 1 gl. - $19.95 (larger sizes available for pick up only)
- **LIME GLOW (Intermediate)** Semi-dwarf in size, with a mounded pyramidal habit and lime green needles that make this cedar a standout. Growing 6”–8” per year, becoming more upright with age. (pick up only)
CHAMAECYPARIS OBTUSA HINOKI Cypress
Hardy to Zone 5
Many forms of this lovely conifer are available.

- **COMPACTA** (Intermediate) Upright, pyramidal hinoki cypress having shell shaped sprays of bright green foliage. Grows 4’-6” per year. Best in well drained, rich soil, in full sun or partial shade.

- **MARIESII** (Dwarf) An upright, irregular dwarf form of Hinoki Cypress with sprays of deep green foliage flecked in cream. Grows 3’-4’ per year. Best in partial shade. (pick up only)

- **NANA LUTEA** (Dwarf) This popular dwarf Hinoki Cypress has cupped, lemon-yellow-over-dark-green sprays of foliage. Slow growing, only 3’-4’ per year. (pick up only)

CHAMAECYPARIS PISIFERA ‘TSUKOMO’ SAWARA FALSE CYPRESS
Hardy to Zone 4

- **Miniature** A very dwarf mound of dense, soft green foliage. Grows less than 1’ per year. Excellent for rock gardens and troughs. 1 gl. - $19.95 (larger sizes available for pick up only)

CRYPTOMERIA JAPONICA JAPANESE CEDAR
Hardy to Zone 6

- **BLACK DRAGON** (Dwarf) Slow-growing form of Japanese Cedar, growing 4’-6” per year. The dense foliage is dark green, with lime-green new growth.

- **ELEGANS** (Intermediate) Soft, gray-green summer foliage turns bronze-purple in winter. Grows 6’-8” per year.

JUNIPERUS COMMUNIS ‘EFFUSA’ COMMON JUNIPER
Hardy to Zone 5

- **Dwarf** A slow growing, prostrate mat of dark green and silvery needles. Can grow 3’-6” per year. 1 gl. - $15.95 (larger sizes available for pick up only)

JUNIPERUS SQUAMATA ‘BLUE STAR’ HIMALAYAN JUNIPER
Hardy to Zone 5

- **Dwarf** Slow-growing, mound conifer, only growing 2’-3’ per year. Steely blue needles have best color in full sun. (pick up only)

PICEA ABIES ‘REPENS’ NORWAY SPRUCE
Hardy to Zone 5

- **Dwarf** Much wider than tall, this low-growing spruce holds its branches in horizontal layers. Grows about 5’-4” per year, to 1’-2’ high and 4’-6” wide in 10-15 years. 1 gl. - $19.95 (larger sizes available for pick up only)

PICEA SITKENSIS ‘SILVERZWERG’ DWARF SITKA SPRUCE
Hardy to Zone 6

- **Dwarf** A dwarf form of our native Sitka spruce. Silvery needles on a rounded globe form, growing 1’-2’ per year. Full sun, average soil. (pick up only)

PINUS BANKSIANA ‘SCHOODIC’ JACK PINE
Hardy to Zone 5

- **Dwarf** Beautiful dwarf prostrate pine, growing 2’-4” per year. Irregular, twisting, horizontal branches with a bonsai-like form. Full sun, well-drained soil. 2 gl. - $34.95

PINUS CONTORTA VAR. CONTORTA SHORE PINE
Hardy to Zone 4

- **Intermediate** Our native 2 needled pine. Irregular, compact, pyramidal form, with deep green needles. Excellent pine for oriental training and pruning. Moderate growth rate, about 8’-10’ per year. Full sun, tolerant of most soils. 1 gl. size - $15.95

PINUS MUGO ‘CARSTEN’S’GOLD MUGO PINE
Hardy to Zone 2

- **Dwarf** A dense, dwarf form of mugo pine, wider than tall, growing 2’-4” per year. Lime-green in summer, becoming rich golden yellow in winter. (pick up only)

PINUS PUMILA ‘DWARF BLUE’ DWARF STONE PINE
Hardy to Zone 4

- **Dwarf** Slow, mounded pine with blue needles. Irregular spreading habit, growing 3’-4” per year. (pick up only)

PINUS SYLVESTRIS SCOTS PINE
Hardy to Zone 3

- **ALBYS** One of the best groundcover pines, low and creeping, with dark-blue-green needles. The color is retained even in winter. Grows 6’-8” per year.

- **HILLSIDE CREEPER** (Intermediate) Another great creeping groundcover pine with bright green needles, turning almost chartreuse in winter. Grows 8’-12” per year. (pick up only)

PINUS THUNBERGI ‘THUNDERHEAD’ JAPANESE BLACK PINE
Hardy to Zone 5

- **Intermediate** Dark green needles contrast with white candles (growth tips) in winter. Its compact irregular form is wider than tall. Grows 6’-8” per year. (pick up only)

SEQUOIADENDRON GIGANTEUM GIANT REDWOOD
Hardy to Zone 6

- **Large** A fast-growing conifer, growing 18’-24” per year, eventually to 200’. Prefers deep, well-drained, moist soil, but will tolerate some winter wetness. Full sun or partial shade. (pick up only)

TAXUS BACCATA YEW
Hardy to Zone 5

- **FASTIGIATA** (Dwarf) Very upright conifer, growing 6’-8” per year, can reach 15’-20’ high and 4’ wide. Deep green needles. A Great Plant Picks selection. (pick up only)

- **FASTIGIATA AUREA** (Dwarf) Very upright conifer, growing 6’-8” per year, old plants can reach 15’-20’ high and 4’ wide. Gold-tipped green needles. (pick up only)

THUJA PLICATA WESTERN RED CEDAR
Hardy to Zone 5

- **Excelsa** (Large) 12’-15’ per year. Holds onto its low branches. Good hedging plant. 1 gl. - $12.95

- **SALMON RIDGE** (Large) Our local selection of the Northwest native Western Red Cedar. The original tree is on the North Fork of the Nooksack River, and has a strongly weeping form, much like an Alaskan Cedar. Fast growing, 8’-10’ per year. (pick up only)

- **VIRESCENS** (Large) Almost columnar when young, broadening with age. Holds deep green color through the winter. Grows 10’-12’ per year. Good hedging plant. 1 gl. - $12.95 (larger sizes available for pick up only)
ORNAMENTALS

• ZEBRINA (Large) Bright yellow foliage striped deep green. Pyramidal form, grows 12”–15” per year. (pick up only)

TSUGA CANADENSIS CANADIAN HEMLOCK
Hardy to Zone 4 Small needles, many forms; tolerant of sun or shade.

• BENNET (Dwarf) A semi-prostrate conifer for sun or shade. Deep green needles. Grows 4”–6” per year. (pick up only)

• BETTY ROSE (Dwarf) A dwarf, mounded form, slightly wider than tall, with white-tipped branches. Grows 2”–3” per year. Sun to partial shade. (pick up only)

• COLE’S PROSTRATE (Dwarf) A wonderful hemlock for the rockery, grows 3”–4” per year, perfectly flat to the ground. (pick up only)

• EVERITT GOLDEN (Dwarf) Spreading at first, and then becoming upright, this golden-foliaged hemlock is a very colorful accent plant. Grows 4”–6” per year. (pick up only)

• FREMDII (Dwarf) This hemlock is taller than wide, growing 4” or more per year. Ascending branches have dense, deep-green needles. 1 gl. - $19.95 (larger sizes available for pick up only)

• GENEVA (Intermediate) A compact, upright little tree that is happy in full sun or partial shade. Irregular form growing 8”–10” per year. (pick up only)

• LITTLE JOE (Miniature) Spreading at first, and then becoming upright, this golden-foliaged hemlock is a very colorful accent plant. Grows 4”–6” per year. (pick up only)

• NANA GRACILIS (Dwarf) Mounded form, growing 3”–4” per year. Small green needles have a silvery cast.

TSUGA MERTENSIANA - MOUNTAIN HEMLOCK
Hardy to Zone 5

• BUMP’S BLUE (Intermediate) Selected form of PNW native conifer, with very blue needles. Broad pyramidal shape, grows 6”–8” per year. 1 gl. - $24.95

• SHERWOOD COMPACT (Dwarf) Selected form of PNW native conifer, with very blue needles. Broad pyramidal shape, grows 6”–8” per year. 1 gl. - $24.95

• SEEDLING (Intermediate) The rather small needles are blue-green with a silver cast. Perfect for a small native garden. Very hardy, no problem with cold winds. 6’ in 10 years. (pick up only)

AKÉBIA QUINATA PURPLE FORM CHOCOLATE VINE
Hardy to Zone 5
Semi-evergreen vine with lacy foliage and deep-purple flowers that smell like chocolate. If strains of Akebia are planted, it may set an ugly but edible fruit. (pick up only)

CLEMATIS

• ARMANDII APPLE BLOSSOM Hardy to Zone 7
This vigorous, evergreen clematis vine grows to 15’–20’ or more. Very fragrant pink flushed, white flowers bloom early-to-mid spring. Full sun to part shade, in rich, moist, well-drained soil. Can be pruned yearly, immediately after flowering. Protect from NE winter winds. A Great Plant Picks selection. 1 gl. - $21.95

• MONTANA ELIZABETH Hardy to Zone 5
Vigorous vine covered with a profusion of 3-inch pink flowers in late spring. This cultivar is the most fragrant of all the montanas, with a sweet vanilla scent. The new foliage emerges bronze and changes to green in early summer. Can eventually reach 40’. Blooms on new wood; prune immediately after flowering. Established plants can be cut back to 12’. (pick up only)

• VITICELLA POLISH SPIRITS Hardy to Zone 4
Prolific summer blooms of deep purple midsummer into fall. Can reach 10’–12’. Prune in late fall or early spring. Established plants can be cut back to 12’. (pick up only)

• ROGUCHI Hardy to Zone 4
Hummer magnet! Nodding, dark purple-blue flowers. 11/2–2” long, 1” in diameter. Blooms June–September. This variety is a hybrid of Cl. integrifolia x Cl. reticulata. Ht. 5–6’. Prune to lowest strong buds each spring. 1 gl. - $16.95 (larger sizes available for pick up only)

HYDRANGEA ANOMALA PETIOLARIS CLIMBING
HYDRANGEA Hardy to Zone 4
The foliage and rich, coppery brown branch pattern are enough to recommend this plant. Flat white lace-cap flowers. Sun to shade, moist soil. Clings without a trellis. A Great Plant Picks selection. Hardy to Zone 4. 1 gl. - $19.95

LONICERA PERICLYMENUM VAR. SEROTINA LATE DUTCH HONEYSUCKLE Hardy to Zone 5
Moderately vigorous vine grows to 15’. Long lasting display of bicolor creamy white and reddish-pink flowers are extremely fragrant. The deciduous foliage is green suffused with purple. 1 gl. - $19.95

PARTHENOCISSUS HENRYANA SILVERVEIN CREEPER Hardy to Zone 6
A superb vine for sun or shade, with five lobed leaves of dark green, veined with silver. The foliage turns brilliant scarlet red in autumn. Self-clinging on wood or bark. 1 gl. - $18.95

WISTERIA FLORIBUNDA ‘TEXAS PURPLE’ Hardy to Zone 5
Very large, showy clusters of fragrant bluish-purple flowers. Vigorous vine, growing up to 12’ per year. 25’-30’ at maturity. Best in sun. 1 gl. - $23.95

climbing vines
perennials & herbs

**AGAVE PARRYI VAR. PARRYI AGAVE**
Hardy to Zone 6
Cold hardy and moisture tolerant. Compact, globous, rosettes growing to 2’ high and wide. Plant in full sun, sharply drained soil. 1 gl. - $14.95

**ALLIUM ACUMINATA HOOKER’S ONION**
Hardy to Zone 4
One of our native alliums, Hooker’s Onion blooms in late spring to early summer with clusters of bright rose-purplish flowers. Can reach up to 12” tall. Best in full sun. Deer resistant and very attractive to butterflies. Drought tolerant, will go dormant after blooming. 4” pots- $6.95

**ARENARIA MONTANA ‘LEMON ICE’ SANDWORT**
Hardy to Zone 4
Alpine or rock garden plant that forms a low evergreen cushion of grey-green leaves, bearing loads of bright yellow buds that open to large, pale lemon-yellow flowers during the spring months. In sandy soils, this will root and spread slowly to form a patch. Drought tolerant. 4” pot- $3.95

**ARMERIA JUNIPERFOLIA DWARF SEA THRIFT**
Hardy to Zone 2
Evergreen grass-like mound, to 3’, topped in early spring with globes of pink flowers on short stems. Shear for summer rebloom. Sun, well-drained soil. Good rockery plant. 4” pots - $3.50

**BLECHNUM PENNA-MARINA ALPINE WATER FERN**
Hardy to Zone 6
Evergreen fronds emerge bronze tinged, can grow 4”-6” high, slowly spreading to form mats. Best in full to partial shade in rich, moist humusy soil. A great groundcover. 6” pots - $11.95

**BLECHNUM SPICANT DEER FERN**
Hardy to Zone 5
Pacific Northwest Native fern with evergreen fronds that grow 18”-30” high and wide. Best in full to partial shade in rich, moist soil. 1 gl. - $12.95

**BRODIAEA CORONARIA CROWN BRADIAEA**
Hardy to Zone 7
Native bulb, this member of the lily family starts blooming in late spring to early summer as the soil starts to dry out. Violet-blue upright vase-shaped flowers can grow to 6”-10” above the basal leaves. Goes dormant after flowering. Best in full sun. 4” pot- $6.95

**CAMAS LEICHTLINII GREATER CAMAS**
Hardy to Zone 4
Pacific Northwest Native bulb, blooming in mid-spring with spikes of blue flowers. Tolerates winter-wet soil, also does well in ordinary garden soil. Will self-seed if happy. Full sun. 6” pots - $10.95

**CAMPANULA PORTENSCHLAGIANA DALMATION BELLFLOWER**
Hardy to Zone 3
Low, evergreen to semi-evergreen creeping mat is topped late spring by cheerful blue bells. Shear for repeat bloom. Will self-seed a bit. Sun or shade, low water use. 4” pots - $3.95

**DICENTRA FORMOSA PACIFIC BLEEDING HEART**
Hardy to Zone 4
Finely cut foliage is topped early to late spring with pinkish-purple, drooping flowers. Spreads by rhizomes. Prefers shade to part shade. 4” pots - $3.95

**DRYAS OCTAPETALA MOUNTAIN AVENS**
Hardy to Zone 3
Native to Western mountain ranges, this low-growing, mat-forming, semi-evergreen plant blooms in mid-spring with striking single white flowers followed by silky seed heads. Prefers full sun and well-drained soils. 4” pots - $4.95

**FRAGARIA CHILONEIS COASTAL STRAWBERRY**
Hardy to Zone 5
Northwest native strawberry with semi-evergreen, glossy, leathery leaves. White flowers are sometimes followed by tiny strawberries. Full sun, well-drained soils. 4” pots - $3.95

**FRITILLARIA AFFINIS (LANCEOLATA) CHOCOLATE LILY**
Hardy to Zone 5
PNW Native wildflower, chocolate-maroon bells bloom early spring. Grows to 6”-8” high. Sun to part shade, spring moist, summer dry soil. 4” pots - $6.95

**FUCHSIA MAGELLANICA HARDY FUCHSIA**
Hardy to Zone 7
Evergreen foliage marbled in bronze, with bright-yellow spring flowers. Slowly spreads to form large clumps. Part shade, average soil. 4” - $7.95, 6” - $12.95

**LAVENDULA SPECIES LAVENDER**
Hardy to Zone 5
Evergreen shrubby herb with fragrant gray foliage and wands of flowers in summer. Drought tolerant. Full sun, well-drained soil. 4” pots - $4.95

**LECHLADIE MAGICIAN**
A vigorous, upright hardy fuchsia with lavender flowers accented by purple corolla. Does well in part shade to full sun. Can reach 4’-5’ when established.

**MOLELAES**
Small, narrow, delicate, pale pink flowers are prolific and long blooming on this upright hardy shrub. Cut back early spring. Part shade, moist soil. To 4’.

**TON THUMB**
A very hardy small fuchsia with upright habit, growing to 2.5’ high and wide. From late spring to frost, small flowers bloom, with deep purple and tubes and mauve pink corollas.

**LAVANDULA SPECIES LAVENDER**
Hardy to Zone 5
Evergreen shrub with fragrant gray foliage and wands of flowers in summer. Drought tolerant. Full sun, well-drained soil. 4” pots - $4.95

**ANGUSTIFOLIUM HICDOTE**
Deep purple-blue spikes bloom over a long period in summer. Fragrant foliage is soft gray-green. Full sun, well-drained soil. Grows to 12’ high & wide.2.5’ high and wide.
**ORNAMENTALS**

- **INTERMEDIA GROSSO** Long, deep purple-blue spikes bloom over a long period in summer. Very fragrant. Grows to 24” high and wide.

- **LEWISIA COTYLEDON LEWISIA**
  Hardy to Zone 3
  Evergreen rosettes bloom in shades of white, or pink to salmon. Prefers very good drainage in sun to partial shade; best with gravel mulch. 4” pots - $5.95

- **MENTHA SPICATA VAR. CRISPA ‘MORRACAN’ SPEARMINT**
  Hardy to Zone 5
  The best spearmint for tea and culinary uses. This mint is compact and grows to 24” high and wide. Full sun to partial shade. Will spread by runners. Can be grown in a pot to restrict spreading. 1 gal. - $9.95

- **MENTHA X VILLOSA – MOJITO MINT**
  Hardy to Zone 5
  The classic mint in Cuban beverages, aromatic with sweet undertones. Grows to 24” high and wide. Full sun to partial shade. Will spread by runners. 1 gal. - $9.95

- **NEPETA X FAASSENII ‘WALKER’S LOW’ CATMINT**
  Hardy to Zone 3
  Small gray green fragrant leaves form wide mounds 12” high, 18” wide. Masses of lavender-blue flowers are borne on spikes in early summer. Cut back spent flowers for repeat bloom. Full sun, well-drained soil. Loved by bumblebees. Deer resistant and drought tolerant. 1 gal. - $9.95

- **PENSTEMON DAVIDSONII DAVID’S PENSTEMON**
  Hardy to Zone 4
  Evergreen mat-forming shrubby penstemon, with trumpet-shaped pink to violet flowers in spring. Grows to 3’–4’ high, spreads to 12” wide. Full sun, well-drained soil. Loved by hummingbirds and bumblebees. 4” pots - $4.95

- **PENSTEMON PINIFOLIUS PINE LEAVED PENSTEMON**
  Hardy to Zone 5
  Fine, needle-like foliage, grows to 10”–12”. Warm-red, narrow trumpet-like flowers in early summer, attractive to hummingbirds. Drought tolerant, well-drained soils, full sun. 4” pots - $3.95

- **PENSTEMON X CANDY WINE BEARDTONGUE**
  Hardy to Zone 7
  Growing to 3’ tall & 2’ wide, this vigorous penstemon blooms late-summer to frost with white throated, coral-red tubular bells that attract hummingbirds and bumblebees. Full sun, average to dry soil. 6” pots - $10.95

- **PEROVSKIA ATRIPLICIFOLIA RUSSIAN SAGE**
  Hardy to Zone 4
  Tall spikes of smoky blue flowers bloom mid-to-late summer above silvery foliage. Grows to 3’–4’ high, 2’–3’ wide. full sun. Drought tolerant, deer resistant. 6” pots - $10.95

- **PHYGELIUS X RECTUS CAPE FUCHSIA**
  Hardy to Zone 7
  A deciduous to semi-evergreen shrub, often grown as a perennial. These drought-tolerant plants bloom from midsummer almost until frost and are very attractive to hummingbirds. Deer resistant. Spreads by suckers. 6” pots - $10.95

- **CHERRY RIPE** Bright red tubular flowers with yellow throats bloom on plants growing 2’–3’ tall.

- **CORAL PRINCESS** Salmon-colored tubular flowers with a hint of soft yellow in the throats in summer.

- **MOONRAKER** Tubular flowers of pale yellow bloom atop 4’-5’ plants in summer.

- **POLYSTICHUM MINUTUM SWORD FERN**
  Hardy to Zone 6
  A deciduous to semi-evergreen shrub, often grown as a perennial. These drought-tolerant plants bloom from midsummer almost until frost and are very attractive to hummingbirds. Deer resistant. Spreads by suckers. 6” pots - $10.95

- **ORIGANUM X ‘KENT BEAUTY’ FLOWERING OREGANO**
  Hardy to Zone 4
  Culinary oregano with a strong, pleasantly spicy flavor. Harvest leaves before flowers appear, cut back after flowering. Grows to 12”–20” high. Full sun, lean soil, drought tolerant. 1 gal. - $9.95

- **SALVIA X SYLVESTRIS ‘CARADONNA’ FLOWERING SAGE**
  Hardy to Zone 5
  Violet-blue flowers throughout summer (and fall if cut back monthly). This variety is noted for its striking dark stems. Full sun, average soil, 18”–24” 6” pots - $10.95

- **SALVIA OFFICINALIS ‘BERGGARTEN’ CULINARY SAGE**
  Hardy to Zone 4
  Low-growing, broad-leaved form of edible sage. This select strain has large leaves and wonderful flavor. Spikes of blue flowers early summer. Sun, well-drained soil. Drought tolerant, deer resistant, and pollinator attractant. 6” pots - $10.95
ORNAMENTALS

THYMUS VULGARIS ENGLISH THYME
Hardy to Zone 4
Small evergreen shrub whose leaves are the culinary thyme so common in the kitchen. Grows to 15’ high, 10’-12’ wide. Full sun, well-drained soil. 4” pots - $3.95, 1 gl. - $9.95

THYMUS X ‘LIME’ THYME
Hardy to Zone 5
Small evergreen perennial/shrub whose leaves are much like the culinary thyme so common in the kitchen, but with a hint of citrus. Lime green foliage makes this a standout in the garden. Grows to 15’ high, 10’-12’ wide. Full sun, well-drained soil. 1 gl. - $9.95

ZONCHNERIA SEPTENTRIONALIS ‘SELECT MATTOLE’ CALIFORNIA FUCHSIA
Hardy to Zone 4
(Epilobium) Silvery leaves contrast with the deep orange-red fuchsia-like flowers that bloom from July through September. Low mounds spread slowly on this drought-tolerant, sun-loving plant. 1 gl. - $10.95

ZUICHERIA GRANDIFLORA ‘AUTUMN BRILLIANCE’ SERVICEBERRY
Hardy to Zone 4
A spreading shrub with graceful branch patterns, prolific spring bloom, and excellent, reliable fall color. Berries are attractive to birds. Tolerant of most soils. 18”~24” Bare root - $23.95

AMELANCHIER ALNIFOLIA WESTERN SERVICEBERRY
Hardy to Zone 3
Deciduous shrub with prolific white flowers in late spring. Large, blueberry-like fruits ripen late June to early July. Matures at 10’-12’. Tolerant of most soils. Best fruiting in full sun, also good in partial shade. (pick up only)

AZALEA
Hardy to Zone 5
Deciduous shrubs that bear bright, fragrant flowers in late spring. Good in sun or shade and average soil. (pick up only)
• GIBRALTER Brilliant orange-flushed red flowers held in a tight ball truss. Compact habit, maturing at 4’-5’. Good mildew resistance.
• LEMON LIGHTS Matures at 4’. Soft, lemon-yellow flowers are brightly fragrant. The deep-green foliage is very disease resistant. Fall colors range from red to purple.
• ROSY LIGHTS Very hardy, deciduous azalea. Matures at 4’ high. Dark, rosy-pink blossoms are sweetly fragrant. The foliage is disease resistant, and takes on fall tones of gold and orange.
• WHITE LIGHTS Ruffled, white blossoms have a yellow band on the upper lobe and are sweetly fragrant. The foliage is disease resistant, with good fall tones of gold and orange. Grows to 4’.

BERBERIS THUNBERGII ‘HELMOND PILLAR’ BARBERRY
Hardy to Zone 5
Deciduous, columnar shrub growing to 6’ high, 1’ wide, with deep-purple foliage. Tiny yellow flowers are fragrant, with red berries in fall as the leaf color intensifies to crimson. Deer leave it alone! Tolerant of most soils, and drought tolerant. (pick up only)

DECIDUOUS SHRUBS

CALLICARPA BODNERI ‘PROFUSION’ BEAUTYBERRY
Hardy to Zone 5
Upright deciduous shrub, growing to 8’~10’. Pale-pink midsummer flowers are followed in fall by deep-violet fruit. Fall foliage of red and maroon. A Great Plant Picks selection. 1 gl. - $12.95; (larger sizes available for pick up)

CORNUS SERICEA ‘BLOOD ORANGE’ REDTWIG DOGWOOD
Hardy to Zone 4
Colorful twigs are yellow at the base and grade into red at the tips. Striking for winter color! Grows to 4’-5’. Green summer foliage turns shades of yellow to red in fall. Tolerant of both wet and dry soil. Prune out oldest wood to maintain twig color. 18”-24” Bare root - $18.95

COTINUS COGGYGRIA SMOKE BUSH
Hardy to Zone 5
Large deciduous shrubs, eventually to 15’ but can be kept smaller with pruning. Colorful foliage and airy flower plumes are attractive. Somewhat deer and drought resistant. (pick up only)
• GOLDEN SPIRIT Brilliant golden-yellow leaves in sun, bright chartreuse when grown in shade, with fall tones of gold, coral, orange and red. Pink-flushed cream flower plumes.
• GRACE Large oval leaves emerge steel blue and darken to deep purple in summer. The foliage turns brilliant orange and red in fall. Large plumes of pink flowers borne in summer.
• OLD FASHIONED Large, bluish green foliage emerges flushed pink and purple. Early summer bloom of pale, smoky-pink plumes. Fall colors are a blend of pink, orange, and red.
DAPHNE X TRANSLANTICA ‘BLAFRA’ ETERNAL FRAGRANCE
DAPHNE
Hardy to Zone 6
Semi-evergreen to deciduous daphne growing to 3’ high and wide. In spring, the sweetly fragrant flowers begin—pink flushed white—and continue sporadically through the summer. Sun to light shade, well-drained soil. (pick up only)

DIERVILLA RIVULARIS BUSH HONEYSUCKLE
Hardy to Zone 4
Compact deciduous shrubs grown for their colorful foliage and long season of honeysuckle-like flowers that attract bees and butterflies. Drought and deer resistant. (pick up only)

• HONEYBEE: Low growing to 3’ tall, 4’ wide with brilliant yellow foliage. Yellow flowers most of the summer.
• TROJA BLACK: Foliage emerges burgundy-bronze and matures to deep green in summer. A long summer season of bright yellow honeysuckle-like flowers. Grows to 4’ tall, 5’ wide.

EDGOWORTHIA CHRYSANtha ‘GRANDIFLORA’ PAPERBUSH
Hardy to Zone 7
Very fragrant yellow, daphne-like flowers bloom over a long period in February and March. Tropical-looking foliage on striking stems give the plant an exotic summer look. Best flowering in a warm site. (pick up only)

ENKIANTHUS CAMPANULATUS REDVEIN ENKIANTHUS
Hardy to Zone 6
A beautiful shrub grown for its spectacular fall colors of yellow, orange, and red. Bell-like May flowers are large, creamy-bronze with red veining. Picturesque in habit, it may reach 8’ in time. Sun or partial shade, and rich, acidic soil. (pick up only)

FORSYTHIA X ‘NORTHERN GOLD’ FORSYTHIA
Hardy to Zone 3
Deciduous shrub with arching upright branches that bear golden-yellow, bell-shaped flowers in late winter to early spring. Grows to 8’. Best in full sun, tolerant of most soils, usually ignored by deer. (pick up only)

FOTHERGILLA X INTERMEDIA ‘MT. AIRY’ FOTHERGILLA
Hardy to Zone 5
A selected form of fothergilla, with a vigorous, upright habit, growing to 5’. The deep-green summer foliage takes on tones of gold, orange, and red in autumn. A Great Plant Picks selection. (pick up only)

HEPTACOicum MICINOIDes SEVEN SOON FLOWER
Hardy to Zone 5
A bold deciduous shrub prized for its ornamental peeling bark and intensely fragrant autumn flowers that are a boon to pollinators. Can grow to 15’ but easily kept smaller with pruning. Best in sun or partial shade, well-drained soil with ample summer water. A Great Plant Picks selection. 1 gl. - $15.95, (larger sizes available for pick up)

HOLODISCUS DISCOLOR OCEAN SPRAY
Hardy to Zone 6
PNW native deciduous shrub, with June flowers of creamy white. Grows to 10’ – 12’. Best in sun to part shade. Tolerant of most soil types, and tolerates drought once established. 1 gl. - $14.95, (larger sizes available for pick up)

LONICERA INVOLUCRATA BLACK TWiNBERRY
Hardy to Zone 4
PNW native shrub with yellow spring flowers followed by black berries. Excellent bird-habitat plant. Moist to wet soils, sun to part shade. Grows to 8’. 1 gl. - $12.95

HYDRANGEA MACROPHYLLA BIGLEAF HYDRANGEA
Hardy to Zone 5
• NIKKO BLUE: A classic hydrangea cultivar, growing to 6’ high and up to 8’ wide. Long summer bloom of blue mophead flowers in acid soils, pink in alkaline—great as cut flowers. (pick up only)
• KINGFISHER (’TELLER EISVOGEL’): The lacecap flowers are formed from large petals—blue or violet in acidic soils, fuchsia-pink in alkaline soils. Grows to 4’ – 6’. 1 gl. - $16.95
• PINK BEAUTY: Summer bloom of dark pink lacecaps over large foliage touched in pink. Fall foliage color of deep wine red. Grows to 4’ – 6’. 1 gl. - $16.95
• GLOWING EMBERS: Large heads of reddish pink. A vigorous cultivar for sun or shade, grows to 4’. Flowers on wood produced the previous year. A Great Plant Picks selection. 1 gl. - $16.95

HYDRANGEA QUERCIFOLIA SIKE’S DWARF OAKLEAF
Hardy to Zone 4
Conical flowers of ivory white appear late summer into fall. Oak-shaped leaves turn burgundy-red in autumn. Grows to 3’ high and wide. 1 gl. - $16.95, (larger sizes available for pick up)

HYDRANGEA PANICULATA ‘WHITE MOTH’ HYDRANGEA
Hardy to Zone 4
Huge conical flowers of pure white fading to pale green, blooms from mid-July until late September. Great cut flowers. Blooms on new wood. Grows to 8’ – 10’ or more unpruned. 1 gl. - $16.95

PHILADELPHUS LEWISII ‘BLIZZARD’ MOCK ORANGE
Hardy to Zone 5
Selected form of our native mock orange. More compact than seedling mock orange, growing to 6’ with prolific June bloom of very fragrant white flowers. Sun to partial shade, drought tolerant once established. 1 gl. - $12.95, (larger sizes available for pick up)

**HYDRANGEAS**
A group of woody shrubs unequaled for summer bloom. Most will tolerate full sun in the Northwest if summer irrigated, and all will thrive in shade to partial shade.

**Varieties native to PNW**

**HYDRANGEA MACROPHYLLA BIGLEAF HYDRANGEA**
Hardy to Zone 5

**HYDRANGEA QUERCIFOLIA SIKE’S DWARF OAKLEAF**
Hardy to Zone 4

**HYDRANGEA PANICULATA ‘WHITE MOTH’ HYDRANGEA**
Hardy to Zone 4

**PHILADELPHUS LEWISII ‘BLIZZARD’ MOCK ORANGE**
Hardy to Zone 5
PHYSOCARPUS CAPITATUS WESTERN NINE BARK
Hardy to Zone 3
Arching stems are treasured for their peeling brown and tan bark. The white flower clusters appear in late spring, followed by seed heads that attract songbirds. Not fussy about light or soil. Grows to 8’–10’ high and wide. (larger sizes available for pick up)

POTENTILLA FRUTICOSA SHRUBBY CINQUEFOIL
Hardy to Zone 2
Selected forms of a native shrub with silvery leaves. drought and deer resistant.

• KATHERINE DYKES The bright lemon-yellow flowers bloom midsummer through to frost. Grows to 2’–3’ high and wide. (pick up only)

• PRIMROSE BEAUTY A deciduous shrub with silvery leaves, growing to 2’–3’ high, wider than tall. The cheerful pale-yellow flowers bloom midsummer through to frost.  1 gl. - $12.95

• SNOWFLAKE The pure white flowers bloom midsummer through to frost. Grows to 3’ high and wide. 1 gl. - $12.95

OEMLERIA CERASIFORMUS INDIAN PLUM
Hardy to Zone 6
This mid-sized deciduous native shrub signals the end of winter with clusters of small drooping white flowers, followed by a small bittersweet plum-like fruit that is attractive to wildlife. Best in part shade. Can reach 15’ in time. (pick up only)

RIBES SANGUINEUM ‘KING EDWARD’ FLOWERING CURRANT
Hardy to Zone 6
Selected form of our native flowering currant with deep reddish pink flowers, a little later than the species. Early spring blooms welcome hummingbirds, followed by berries favored by songbirds. Partial sun, well-drained soils, deer resistant. Compact form to 6’ A Great Plant Picks selection. 1 gl. - $14.95, (larger sizes available for pick up)

ROSA RUGOSA HYBRID ‘LINDA CAMPBELL’ RUGOSA ROSE
Hardy to Zone 4
Hybrid rugosa roses are tough performers in the garden, with long bloom seasons and good drought tolerance. Upright growing with lightly fragrant, deep-red flowers blooming throughout the summer. Grows to 6’ (pick up only)

SALIX WILLOWS
Shrubby willows are known for their tolerance of winter wet soils. Their late winter to early spring blooms are an important food source for pollinating insects when little else is in bloom.

• SACHALINENSIS SEKKA (JAPANESE FANTAIL WILLOW)
Hardy to Zone 5
A vigorous deciduous shrub grown for its curved and twisting, fasciated (flattened) stems that are dotted in late winter with small, silvery catkins. Can be cut to the ground annually to control size. 1 gl. - $10.95

• YEZOALPINA JAPANESE DWARF WILLOW
Hardy to Zone 5
A prostrate deciduous groundcover growing 6’ tall and spreading to 4’–6’. Bold, purplish stems are adorned by upright, pale-yellow catkins in early spring. Round green leaves turn bright yellow in autumn. A Great Plant Picks selection. 1 gl. - $10.95, (larger sizes available for pick up)

SAMBUCUS NIGRA ‘GERDA’ BLACK BEAUTY ELDERBERRY
Hardy to Zone 6
Deep maroon-black foliage acts as a foil to the pinkish white flowers. Its arching form can reach 15’, or be pruned hard in spring to give larger, lusher foliage. Full sun gives best foliage color. A Great Plant Picks selection. 1 gl. - $14.95

SAMBUCUS NIGRA SSP. CAERULEA BLUE ELDERBERRY
Hardy to Zone 5
Native deciduous shrub, with an arching form growing to 10’. Blue berries ripen late summer, much loved by birds, great for jams and wine. Likes sun and well-drained soils. Bare root - $13.95

SAMBUCUS RACEMOSA ‘GOLDENLOCKS’ ELDERBERRY
Hardy to Zone 3
Selected form of our native red elderberry. White flowers bloom from late summer to early fall followed by inedible red berries. Bright gold, finely dissected foliage. Dwarf habit grows to 6’ tall, 4’ wide. Best in full sun to partial shade, with rich, moist, well-drained soil. (pick up only)

SPIRAEA X ‘MAGIC CARPET’ – SPIRAEA
Hardy to Zone 3
A dense, low growing deciduous shrub, with coppery toned new growth changing to lime green mature leaves. Deep pink flowers bloom early to mid summer. Grows to 18”–24” high, spreads to 3’. Best in sun to partial shade.

SYRINGA VULGARIS FRENCH LILAC
Hardy to Zone 4
Classic deciduous shrubs grown for their wonderful, fragrant flowers. Best in full sun. Add lime to the soil to promote flowering.

• BEAUTY OF MOSCOW Blooms with fragrant double white flowers opening from pale pink buds. Grows to 8’–10’ in 10 years. 18”–24” Bare root - $22.95

• CHARLES JOLY Blooms are intensely fragrant, deep purple, and fully double. Grows to 8’–10’ in 10 years. One of the best deep purples. 18”–24” Bare root - $22.95

• TINY DANCER A compact form of common lilac, with violet-purple buds opening to fragrant lavender flowers. Grows to 5’ high, 4’ wide over time. Best in sun, with rich, moist soil. (pick up only)

VIBURNUMS
Hardy to Zone 6
Deciduous shrubs grown for form and flower. All are good in part shade to sun, average soils. Most are deer resistant.

• CARLESII AURORA Deep-pink buds opening in mid-spring to intensely fragrant pale-pink to white flowers. Fall foliage color is a blend of orange and red. Grows to 6’ (pick up only)

• PLICATUM SUMMER SNOWFLAKE Grown for its beautiful horizontal branching form. Late spring into summer, the branches are lined with white lacecap flowers, followed by red berries. Grows to 6’–8’ high, 10’ wide. Best in full sun to partial shade, with moist soil. (pick up only)

WEIGELA FLORIDA ‘WINE AND ROSES’ WEIGELA
Hardy to Zone 4
Deep-burgundy leaves highlighted by prolific deep-pink flowers in late spring. Vase-shaped shrub, growing to 4’–5’ high and wide. Sun to part shade, tolerant of many soil types. 1 gl. - $12.95, (larger sizes available for pick up)
rhododendrons

After the name of each rhododendron, we have listed a series of numbers. First is the average size of the plant in 10 years. Then hardiness ratings in degrees Fahrenheit. Lastly, bloom times in the Northwest as follows:

Our descriptions also include American Rhododendron Society (ARS) ratings when possible. The two numbers (e.g. 3/4) rate the appearance of the flower first, then the plant. 5 being excellent (an uncommon rating) and 3 being the most common (lower numbers do not mean the plant is not worth growing). ‘-/’ indicates the rhododendron has not yet been rated by the ARS.

**ORNAMENTALS**

**PJM ELITE**
4’ -25°F E 4/4
Small rounded leaves are green in summer, mahogany-red in winter. The early flowers are lavender pink. The ‘Compacta’ form of PJM has a vigorous, compact habit, and is prolific in flower. Sun tolerant. 2 gl. - $32.95

**POLARNACHT**
3’ -10°F ML -/
Deep green leaves cover this wider-than-tall plant. The frilled, funnel-shaped flowers are deep purple-red with a deep-red spotted dorsal lobe, held in trusses of 12–14 flowers. 2 gl. - $32.95 (larger sizes available for pick up only)

**POMEGRANATE SPLASHED**
5’ 5°F M -/
A new hybrid with stunning flowers of purplish-red-edged white, with a spotted red dorsal flare. A strong growing plant with excellent foliage, from breeder Frank Fujioka of Whidbey Island. 2 gl. - $32.95

**SILVER SKIES**
3’ -10°F M 4/4
A great ‘yak’ hybrid, with long, narrow leaves of deep green, backed by silvery indumentum. The deep-pink buds open to pale-pink flowers with deep-pink margins and stripes on the outsides of the petals. (pick up only)

**SONGBIRD**
3’ -5°F E-EM 3-4/4
Bright purple-blue flowers seem to glow when in bloom. Glossy green foliage growing in compact, dense habit compliment the flowers. Sun tolerant. 2 gl. - $32.95

**TAPESTRY**
4’ -20°F M -/-
Low growing, wider-than-tall plant densely covered with forest-green foliage. Ball-shaped trusses of deep lavender flowers are accented by darker eyes. 2 gl. - $32.95 (larger sizes available for pick up only)

**TEDDY BEAR**
3’ 0°F EM -/
Shiny, deep-green foliage is coated on the undersides with cinnamon-colored indumentum. Pale-pink flowers bloom in trusses, opening from deeper pink buds. 2 gl. - $32.95

**WHISPERING ROSE**
3’ 0°F EM 4/4
A very compact, mounded plant with round, green leaves, accented by red buds. The bell-like flowers are deep rose-pink. 2 gl. - $32.95 (larger sizes available for pick up)

**WINE & ROSES**
3-4’ 0°F EM -/-
A ‘rosevallon’ hybrid, with deep-green foliage whose undersides are velvety purple-red. The early flowers are rose red. (pick up only)
what sets the nursery at cloud mountain farm center apart?

WE PROPAGATE AND GROW PLANTS right here onsite. Propagation methods include growing plants from cuttings, grafting fruit trees, conifers and Japanese maples, and even growing plants from seed.

We plant both fruit and ornamental plants in trials so we can see how they perform in our climate. Our Goodwin Road site, where the nursery is located, tends to run 10°F warmer in summer than nearby Bellingham, and often we can be 10°F colder during the coldest winter weather. We get both strong south winds off the water, and the famous Northeast Fraser valley outflow winds. Those weather variables really test many plants.

Beyond aesthetic beauty or fruit flavor, we evaluate new fruit and ornamental plants so we can be confident they will work in local gardens. We look for disease resistance, drought tolerance, hardiness, benefits like habitat enhancement and pollinator friendliness, and deer resistance.

growing fruit trees at cloud mountain farm center

Producing a ready-to-sell fruit trees is an 18 month process. It starts in July and August, chip bud grafting varieties to rootstock that we have grown since spring.

Fruit trees are grafted (joining a fruit variety with a chosen rootstock).

Why grafted?
Fruit tree varieties do not grow true from seed. Fruit trees are difficult to root from cuttings. Rootstock choice can influence size, soil tolerance, and productivity.

Later in the fall, the budded trees are planted out in clean ground.
The following spring, the buds start pushing a shoot, and the top of the rootstock is cut off.

The trees are staked, irrigated, fertilized and pruned several times during the summer growing season.

After the trees go dormant, either in winter or early spring, the trees are tagged, graded and dug from the field, ready to sell in the sales yard. A tree chip budded in August 2020 will be for sale in February 2022.

**what does ‘hardy’ mean?**

For many plants in the catalog, we have listed how hardy the plant is. What does that mean? The USDA Hardiness Zones are based on Average Annual Extreme Minimum Temperatures. For most of Western Washington, our average extreme minimum winter temperatures are in the 10°–20°F range, putting us into USDA Hardiness Zone 8. We can get colder than 10°F, but most years we don’t. These hardiness zones are only a guideline—plants that are not established may not tolerate as low a temperature as ones that are. Drought stress during the summer can also influence a plant’s ability to withstand winter cold.
We are located along the western edge of the Cascade Mountain range in Northern Washington. Our 42 acres of nursery stock, vegetable fields and fruit orchards grow on the lower slopes of Sumas Mountain, and along the Nooksack River Valley.
